8	<b>Brief Abstract of the Research Work(250 Words)</b>	Odisha, as India's poorest state, requires greater financial inclusion of rural, backward and marginalised populations in order to achieve economic progress and financial stability. The Government of Odisha has taken a variety of steps to bring financially excluded households into financial inclusion, including the creation of Mission Shakti, the promotion of SHGs, and giving financial and CB support to them.Despite the various attempts launched by both the Odisha and the Indian governments, some households in distant areas, backward areas, unbanked areas, and other areas are denied access to formal financial services. As a result, there is a need in these sectors to investigate and investigate why people are denied financial services in certain areas. So for this reason, I will examined the role of financial inclusion in the long term economic growth of the Odisha and also the role of technology like mobile banking in promoting financial inclusion. For this data will be collected from both primary as well as secondary source. The structured questionnaires will be formed for collecting the data from 500 respondents by the stratified random sampling and for the analysis of the collected data, the regression model and structural equation model will be used.
