7	Title of the Research Work		A study of investment pattern, decision making process and its impact with special reference to Mahanadi coal field ltd.			
8	Brief Abstract of the Research Work(250 Words)		Investments decision in mining industry largely depends upon the valuation and comparative study of various available projects. The projects of mining industries are long term and their results are unpredictable in nature involving various uncertainties and risk. In order to minimize these risk and uncertainties these projects and alternative investment opportunities should be studied in terms of various impacting attributes and there casual relationship with each other. Although there are various traditional and strategic investment decision approaches are available those are guiding the industrial investment decision. So, this study will focus on the purpose to discover a better framework with the use of different quantitative tools for deciding the investment pattern that will have a growing impact on the business process and limitations in existing investment pattern and decision making process. Moreover the study is going to evaluate the basic criteria for the same and will attempt to suggest a more comprehensive method for investment decision after comparing the various quantitative techniques.
