

M.Sc. PROGRAMME IN FOOD SCIENCE & TECHNOLOGY

(Effective from Session 2026-27)

(Batch: 2026-2028)

**SAMBALPUR UNIVERSITY
JYOTI-VIHAR, BURLA, SAMBALPUR,
ODISHA-768019**

M.Sc. in Food Science and Technology

SYLLABUS (2026-28)

**P.G. DEPARTMENT OF FOOD SCIENCE
TECHNOLOGY AND NUTRITION
SAMBALPUR UNIVERSITY
JYOTI VIHAR
BURLA**

Courses of Studies for the M.Sc. Food Science and Technology
(Under Course Credit Semester System)

<i>Subject:</i>		M.Sc. Food Science and Technology	<i>Branch:</i>			
Paper Code/Number	Paper Title		Type of Paper	Credit Hour	Mark Distribution	Maximum Marks
FirstSemester- December,2026	FT.411	Primary Food Products	Theory	4	80+20	100
	FT.412	Food Biochemistry and Metabolic Disorder	Theory	4	80+20	100
	FT.413	Applied Food Microbiology	Theory	4	80+20	100
	FT.414	Basic Concept of Nutrition	Theory	4	80+20	100
	FT.415	Practical-I	Practical	2	100	100
	FT.416	Practical-II	Practical	2	100	100
	FT.417	Environmental Studies and Disaster Management	Theory	2	60+40	100
SecondSemester- April,2027	FT.421	Additives and Functional Ingredients	Theory	4	80+20	100
	FT.422	Instrumentation in Food Analysis	Theory	4	80+20	100
	FT.423	Food Safety and Quality Control	Theory	4	80+20	100
	FT.424	Food Processing Technology	Theory	4	80+20	100
	FT.425	Practical-III	Practical	2	100	100
	FT.426	Practical-IV	Practical	2	100	100
	FT.427	Interdisciplinary Course	IDC-Theory	3	60+40	100
ThirdSemester- December,2027	FT.511	Food Preservation and Packaging	Theory	4	80+20	100
	FT.512	Research Methodology and Biostatistics	Theory	4	80+20	100
	FT.513	Industrial Fermentation Technology	Theory	4	80+20	100
	FT.514	Beverages and Baking Technology	Theory	4	80+20	100
	FT.515	Practical-V	Practical	2	100	100
	FT.516	Seminar	Practical	2	100	100
	FT.517	Entrepreneurship Development	Theory	2	60+40	100
FourthSemester- April,2028	FT.521	Agri Food Handling	Theory	4	80+20	100
	FT.522	Elective (Anyone)	Theory	4	80+20	100
	FT.523	Nutraceutical and Functional Foods	Theory	4	100	100
	FT.524	Project / Dissertation	Practical	4	100	100
	FT. 525	Internship Report	Practical	2	100	100
	FT. 526	Project Viva Voce	Practical	2	100	100
	FT.527	MOOC/Alternative Course/IKS	Theory	3	100	100

DETAILED COURSES OF STUDIES

VISION:

Sambalpur University is committed to creating and sustaining a transformative educational environment for its students, staff and faculties in the fields of Liberal Arts, Sciences and Professional Studies so that they become globally competitive through competency in respective domain knowledge, research, innovation and entrepreneurship skills with heightened sense of meaningful community engagements and personal developments.

MISSION:

P.G Department of Food Science Technology & Nutrition of Sambalpur University, Burla strives to impart quality education to the students with enhancement of their skills to make them globally competitive through:

M1	Educate society for generations by providing transformative education with deep disciplinary knowledge and concern for environment
M2	Develop problem solving, leadership and communication skill in student participants to serve the organization of today and tomorrow
M3	Aim for the holistic development of the students by giving them value based ethical education with concern for society
M4	Foster entrepreneurial skills and mindset in the students by giving life-long learning to make them responsible citizens

PROGRAM SPECIFIC OUTCOME (PSO):

PSOs: At the end of the PG Food Science program, the student will be able to:

PSO1	To develop analytical skills in food industry and apply knowledge in the field of community nutrition.
PSO2	To solve complex problems and acquire analytical skills using latest techniques and tools to find out the solution for food, environmental safety
PSO3	To extend the knowledge on various food processing technologies by further research
PSO4	To design project in formulation, standardization of new products and clinical supplementation for starting Small Scale Industries (SSI) or Medium Scale Industries (MSI)

PROGRAM OUTCOMES (POs):

PO-1	Critical Thinking: Take informed actions after identifying the assumptions that frame our thinking and actions
PO-2	Effective Communication: Will be able to speak, read, write and listen clearly in person and through electronic media in English and in one Indian Language
PO-3	Social Interaction (Interpersonal Relation): Elicit views of others, mediate disagreements and prepared to work in team
PO-4	Entrepreneurship Capability: Demonstrate qualities to be prepared to become an entrepreneurship
PO-5	Ethics: Recognize different value systems including your own, understand the moral dimensions and accept responsibility for them
PO-6	Environment and Sustainability: Understand the issues of environmental contexts and sustainable development
PO-7	Life-Long Learning: Acquire the ability to engage in independent and life-long learning in the context of socio-technological changes

FIRST SEMESTER

Course Code: FT-411 (4CH)	Course Name: PRIMARY FOOD PRODUCTS
Pre-requisite: None	Co-requisite: FT-413

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Primary Food Products Relating to the M.Sc. in Food Science and Technology
PEO2	Analyse the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Cereals: Structure of cereal grains, composition, processing and storage of some common cereals (Rice, Wheat, Maize, Oats), Nutritional Importance of Millets.	3
	Pulses and oilseeds: composition, nutritive value, processing and storage of some common pulses.	3
	Nuts & plantation crop: processing, nutritional value of some common nuts (Coconut, Ground nut, Almond, Cashew nut)	3
2	Fruits and Vegetables: Composition, nutritive value and classification	1
	Canning: Definition, processing steps, and equipment, cans and containers, quality assurance and defects in canned products.	2
	Preparation and preservation of juices, squashes, syrups, sherbets, nectars, cordials, etc; FSSAI specification Preparation, preservation by jam, jelly and marmalades and various problems with remedies.	3
	Preparation and preservation for manufacture of preserve, candies, concentrate, chutney, sauce, puree, paste, ketchup; toffee, cheese, leather, dehydrated, potato wafers and pickles, soup powders; FSSAI specification.	2
	Spices: Composition, flavoring compounds, processing, nutritive value, adulteration of some common spices of India.	2
3	Meat: classification and Muscle structure	1
	Chemical composition and physico-chemical properties of meat muscle, Abattoir design and layout, Pre-slaughter transport, care and ante-mortem inspection.	2
	Stunning types, slaughtering of animals and poultry, post-mortem inspection and grading of meat, Factors affecting post-mortem changes, quality characteristics of meat.	2
	Processing and preservation of meat- tenderization of meat, curing of meat- role of ingredients and types of curing, smoking of meat, different cooking methods and Restructured Meat- sausages, salami, Chicken wings, chunks (IQF)	2
	Egg structure: Composition, quality characteristics, processing and preservation of eggs.	2
	Fish: composition, classification, nutritive value and processing: surimi; Fish protein concentrates (FPC); Fish protein extracts (FPE), fish protein hydrolysates (FPH), Fish oils.	2
4	Milk and milk products: Operation Flood, composition, physico-chemical properties of milk and nutritional importance of milk, processing of milk.	2
	Classification and study of milk products (with specifications)- Cream, Butter, Ghee, condensed milk, Khoa, Milk powder, Channa, Paneer, Cheese, Ice-cream, Fermented milk products. Various defects in milk products.	5
TOTAL LECTURES =		40

Course Outcomes

CO-1	Remember and understand the basic concepts/Principles of Primary Food Products
CO-2	Analyse the Various Concepts to understand them through case studies
CO-3	Apply the knowledge in understanding practical problems
CO-4	Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

1	Food Facts and Principles -N. Shakuntala Manay& M. Shadakshara swamy, New Age International (P) Limited, New Delhi.
2	Food Science – B. Srilakshmi, New Age international (P) Limited, New Delhi.
3	Post harvest technology of cereals: pulses and oilseeds, Chakravarty A., Oxford & ibh publishing company, 1988
4	Fruit and Vegetable Preservation, Principles and Practices, Srivastava R.P. and Sanjeev Kumar, International Book Distributing Company, New Delhi 2005
5	Principles of Meat Technology, Singh V. P., New India Publishing Agency, Delhi
6	Outline of Dairy Technology, Sukumar De, Oxford University Press, 2008

REFERENCE BOOKS:

1	Handbook of Seed Science and Technology, Basra A., CRC Press, 2006
2	Handbook of Fruit and Vegetable Processing Sinha and Hui, John Wiley and Sons, 2010
3	Handbook of Meat, Poultry and Seafood Quality, Kerth Wiley Backwell, 2012
4	Technology of Milk Processing, Khan QA and Padmanabhan, ICAR, New Delhi
5	Food Science- N.Potter & J.H.Hotchkiss- CBS Publishers & Distributors, New Delhi.

Course Code: FT- 412 (4CH)	Course Name: FOOD BIOCHEMISTRY AND METABOLIC DISORDER
Pre-requisite: None	Co-requisite: FT-411

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Food Biochemistry and Metabolic Disorder Relating to the M.Sc. in Food Science and Technology
PEO2	Analyse the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Metabolic pathways: Carbohydrates- Aerobic and anaerobic degradation, glycogenesis, glycogenolysis, gluconeogenesis HMP shunt pathway. Hormonal regulations of blood glucose, brief about metabolic disorders with reference to CHO. Glycogen storage disease, Essential Pentosuria, Galactosemia, Fructosuria and their MNT.	7
2	Bioenergetics- Principles of bioenergetics, free energy – endergonic and exergonic process, role of high energy compounds in energy storage, formation of ATP- Biological oxidation and electron transport chain- Reduction potentials, anatomical site and components of oxidative phosphorylation, enzymes involved membrane location of electron transport, chemiosmotic theory, inhibitors of respiratory chain.	5

	Lipids- Metabolism of triacylglycerol, oxidation of fatty acids, cholesterol. Regulation of lipid metabolism and ketone bodies. Oxidative stress and antioxidants – Free radicals – definition, formation in biological systems, defense against free radicals. Role of free radicals and antioxidants in health and disease. Determination of free radicals, lipid peroxides and antioxidants and brief about metabolic disorders of lipids metabolism. Gaucher's diseases, Niemann pick disease, Fabry's disease, Tacsach's disease and their MNT.	5
3	Protein: Protein degradation, fate of nitrogen (urea cycle), metabolism of aromatic, Sulphur containing, BCAA and other amino acid pool. Glutamine and alanine cycle, Protein biosynthesis. Nucleic acids metabolism of nucleic acid components biosynthesis of nucleotides, brief about metabolic disorders of protein metabolism. Phenyl ketonuria, Alkaptonuria, Albinism, Cystinuria, Hypertyrosinemia, Homocystinuria and their MNT	5
	Regulation of metabolism: Interrelationship of carbohydrate protein and lipid metabolism. Role of Vitamins and Minerals in metabolism, metabolic adaptation during starvation, exercise, stress, and diabetes mellitus. Significance of enzymes in food metabolism, classification, chemical nature-Enzyme inhibition, enzyme pattern in disease pattern.	5
4	Hormones: Classification- synthesis – regulatory functions and mechanism of hormone action – Prostaglandin structure, biosynthesis, metabolism and biological action and their role in pathology. Brief about metabolic disorders of hormones and enzyme. Down's syndrome, Turner's syndrome, Klinefelter's syndrome and their MNT.	4
	Metabolic disorders: Etiology, Clinical manifestation, MNT- Down's Syndrome, Turner's Syndrome, Klinefelter Syndrome, Maple Syrup Syndrome, CHO Counting, Inborn errors of protein and purine, PKU, MSUD, Tyrosinosis, Homocystinuria, Fructosuria, Organic Aciduria	9
	TOTAL LECTURES =	40

Course Outcomes

CO-1	Remember and understand the basic concepts/Principles of Food Biochemistry and Metabolic Disorder
CO-2	Analyse the Various Concepts to understand them through case studies
CO-3	Apply the knowledge in understanding practical problems
CO-4	Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

1	Fennema, O.R. Ed. 1976. Principles of Food Science: Part-I Food Chemistry. Marcel Dekker, New York.
2	Meyer, L.H. 1973. Food Chemistry. East-West Press Pvt. Ltd., New Delhi.
3	Belitz HD.1999. Food Chemistry. Springer, Verlag
4	Lehninger Principles of Biochemistry, David L. Nelson and Michael M. Cox, 6th Ed. Macmillan Learning, NY, USA. 2012

REFERENCE BOOKS:

Swaminathan M. 1974. Essentials of Foods and Nutrition. Vol. II. Ganesh& Co.
J.L. JAIN, Fundamentals of Biochemistry. S. Chand publication
Satyanarayan and Chakrapani, Biochemistry, 5 th edition., Elsevier, 2013

Course Code: FT-413	Course Name: APPLIED FOOD MICROBIOLOGY
Pre-requisite: None	Co-requisite: None

Programme Education Objectives

PEO 1	Understand the nature and basic concepts of Applied Food Microbiology Relating to the M.Sc. in Food Science and Technology
PEO 2	Analyse the relationships among different concepts
PEO 3	Perform procedures as laid down in the areas of study
PEO 4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Introduction to food Microbiology: Growth and survival of microorganisms in foods (Yeast, Mould, Bacteria)	2
	Factors affecting growth of microorganism: Intrinsic, Extrinsic; Physical and chemical methods to control microorganisms,	3
	Biochemical changes caused by microorganisms; microbes in food fermentation, putrefaction, lipolysis; Antagonism and synergism in microorganism;	2
2	Contamination, General principles of spoilage, Preservation and Spoilage of different kind of foods-cereal,	2
	Preservation and Spoilage of different kind of Pulses.	2
	Preservation and Spoilage of different kind of Fruit and Vegetable,	2
	Preservation and Spoilage of Meat, fish egg, poultry and their processed products	2
	Preservation and Spoilage of milk and different milk products	2

	Preservation and Spoilage of Canned foods and Beverages	2
3	Food toxicology & food borne illness: Food hazards- microbiological, nutritional, environmental, natural toxicants, pesticides, food additives, preservatives food borne illness: (Clostridium, botulinum, Escherichia coli, Brucella, Bacillus, Salmonella, Staphylococcus) Nonbacterial agent & food borne illness, (Helminths & Nematodes, protozoa, toxic algae, fungi & food borne viruses Method for microbial examination of food: indicator organisms, direct examination, cultural techniques, Rapid methods in detection of microorganisms.	5 3
4.	Microbial Food hygiene and sanitation: Contamination during handling, processing and its control	3
	Food fermentation products and beneficial microbes: Yoghurt, Cheese, Sauerkraut, Tofu, etc	5
	Characteristics feature of LAB, General fermentation idea, General concept of Prebiotics, probiotics and symbiotic anti-biotics; bacteriocins from lactic acid bacteria-production and application in food preservation	5
	TOTAL LECTURES =	40

Course Outcomes

CO-1	Remember and understand the basic concepts/Principles of Applied Food Microbiology
CO-2	Analyse the Various Concepts to understand them through case studies
CO-3	Apply the knowledge in understanding practical problems
CO-4	Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

1	Frazier W C . Food Microbiology, McGraw Hill
2	Modern Food Microbiology. James M Jay, Martin J Lossner, David A Golden
3	Food Microbiology Adams M R & Moss. The Royal Society of Chemistry, Cambridge.

REFERENCE BOOKS:

1	Modern Industrial Microbiology & Biotechnology by N. Okafor. 1st edition. CRC Press, USA. 2007.
2	Industrial Microbiology Samuel C Press cott

Course Code: FT-414 (4CH)	Course Name: BASIC CONCEPT OF NUTRITION
Pre-requisite: None	Co-requisite: FT-411

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Basic Concept of Nutrition Relating to the M.Sc. in Food Science and Technology
PEO2	Analyze the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Definition- Food, Nutrition, Health and its determinants, nutrients, nutritional status, malnutrition, undernutrition, overnutrition, optimum nutrition, diet, diet therapy, therapeutic nutrition, kilocalorie, joule, diet diversity, body, daily values, nutrient density.	2

	Food Groups- Classification of Carbohydrates, Fats, Lipids, Protein, Vitamins: (A, B complex, C, D, E & K) – functions, types, metabolism, sources, Major and minor mineral elements with their role in body- Ca, P, Mg, Fe, I, u, Zn, F, Chr, and Se. Importance of Roughages in the diet; Water & electrolytes balance.	10
2	Food Preparation: Selection of foods, preparation methods of food blanching, retrogradation, roux, principles of cooking, methods of cooking, advantages and disadvantages, Effect of cooking on nutritive value, methods of enhancing nutritive value, effect of cooking on nutritive value.	3
	Food as a source of nutrients: classification of nutrients; functions, recommended dietary allowances (RDA), Food pyramid, Balance diet, My plate, Mindful eating (Definition, methods, advantages, disadvantages)	3
	Meal planning: Definition, Principles of planning diets, points to be considered in planning a diet, steps involved (using food composition tables and food exchange list) Factors affecting food choice, Menu planning, exchange list, factors for planning a balance diet.	4
3	Nutritional needs: Nutrition during infancy, pre-school children, school-going children, adolescents, adults, pregnancy and lactation, and old age, athletes/sports persons- physiological changes, nutritional requirements, food requirements as per RDA.	10
4	Nutritional Assessment: Assessment of nutritional status by direct & indirect methods, Anthropometric assessment, clinical examination, bio-physical or radiological measurement, functional assessment, National and international nutrition policies.	5
		3
	TOTAL LECTURES =	40

Course Outcomes

CO-1 Remember and understand the basic concepts/Principles of **Basic Concept of Nutrition**

CO-2 Analyze the Various Concepts to understand them through case studies

CO-3 Apply the knowledge in understanding practical problems

CO-4 Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

1	Dietetics – B. Srilakshmi; New age International (P) Limited, New Delhi.
2	Nutrition Science – B. Srilakshmi; New age International (P) Limited, New Delhi.
3	Human Nutrition and Dietetics – Davidson, Passmore, East wood, English Language Book Society (ELBS).
4	Text Book of Human Nutrition – Mahtab. S. Bamji; N. Pralhadrao & Vinodini Reddy, Oxford & IBH Publishing Co. Pvt.Ltd

REFERENCE BOOKS:

1	Swaminathan M. 1974. Essentials of Foods and Nutrition. Vol. II. Ganesh& Co.
2	Principles of Nutrition – Fisher and Fuqua, Wiley eastern Private Limited, New Delhi.
3	Nutrient Requirements and Recommended Dietary Allowances for Indians – Indian Council of Medical Research, National Institute of Nutrition, Hyderabad.
4	ABC of Nutrition (4th edition), Stewart Truswell, BMJ Publishing Group, 2003

Programme Education Objectives

PEO1 Understand the nature and basic concepts of **Practical –I** Relating to the **M.Sc. in Food Science and Technology**

PEO2 Analyse the relationships among different concepts

PEO3 Perform procedures as laid down in the areas of study

PEO4 Apply the Basic Concepts learned to execute them

Course Outcomes

CO-1 Remember and understand the basic concepts/Principles of **Practical-I**

CO-2 Analyze the Various Concepts to understand them through case studies

CO-3 Apply the knowledge in understanding practical problems

CO-4 Execute/create the Project or field assignment as per the knowledge gained in the course

Course No: FT. 416 Practical-II 2CH

Programme Education Objectives

PEO1 Understand the nature and basic concepts of **Practical –II** Relating to the **M.Sc. in Food Science and Technology**

PEO2 Analyse the relationships among different concepts

PEO3 Perform procedures as laid down in the areas of study

PEO4 Apply the Basic Concepts learned to execute them

Course Outcomes

CO-1 Remember and understand the basic concepts/Principles of **Practical-II**

CO-2 Analyze the Various Concepts to understand them through case studies

CO-3 Apply the knowledge in understanding practical problems

CO-4 Execute/create the Project or field assignment as per the knowledge gained in the course

Course No: EVS and Disaster Management 2CH

Programme Education Objectives

PEO1 Understand the nature and basic concepts of **EVS and Disaster Management** Relating to the **M.Sc. in Food Science and Technology**

PEO2 Analyze the relationships among different concepts

PEO3 Perform procedures as laid down in the areas of study

PEO4 Apply the Basic Concepts learned to execute them

Course Outcomes

CO-1 Remember and understand the basic concepts/Principles of **EVS and Disaster Management**

CO-2 Analyze the Various Concepts to understand them through case studies

CO-3 Apply the knowledge in understanding practical problems

CO-4 Execute/create the Project or field assignment as per the knowledge gained in the course

SECOND SEMESTER

Course Code: FT-421 (4CH)	Course Name: ADDITIVES AND FUNCTIONAL INGREDIENTS
Pre-requisite: FT-411	Co-requisite: None

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Additives and Functional Ingredients Relating to the M.Sc. in Food Science and Technology
PEO2	Analyze the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Properties of foods: Physical properties of solid and liquid foods (solutions, vapor pressure, boiling point, freezing point, osmotic pressure, viscosity, surface and interfacial tensions, specific gravity),	3
	Textural properties, Thermal properties, Frictional properties, optical properties, electrical properties, flow properties, Visco-elastic properties	5
	Dispersion systems in of foods-Sol, Gel, Foam, Emulsion; Rheology of diphase systems.	2
2	Food pigments and colors: Some common pigments used in food industry (chlorophylls, myoglobin, anthocyanin, betalaines, carotenoids, annatto, melnins)- structure and stability;	4
	Turmeric and Cochineal, Artificial food colorants, Inorganic food colorants	2
	Restrictions on the use of colors in foodstuffs	1
	The molecular basis of color	1
	Flavonoids, Tannins and health, color measurement	2
3	Flavors: types of flavour, flavor compounds, extraction principles of flavor, flavor potentiator / enhancers.	3
	Synthetic flavor	1
	Sensation- smell sensation and sensation of taste.	1
	Off flavors in meat, taints	1
	Sensation - texture sensation, visual appearance	2
	Sensation by trigeminal nerve, sensory thresholds	2
4	Food additives: definition, need and classification of food additives, Food Additives generally recognized as safe (GRAS);	1
	Preservatives-Natural and Artificial	1
	Antioxidants and pH control agents in food	1
	Chelating agents, coloring agents, curing agents,	1
	Nutritional supplements, Artificial and non-nutritive sweeteners,	1
	Leavening agents, firming agent, clarifying agent, flour bleaching and maturing agents,	2
	Stabilizer and thickeners, humectants, anti-caking agents, anti-foaming agents, packaging gases	2
	Fat mimetics and replacers	1
	TOTAL LECTURES =	40

Course Outcomes

CO-1	Remember and understand the basic concepts/Principles of Additives and Functional Ingredients
CO-2	Analyse the Various Concepts to understand them through case studies
CO-3	Apply the knowledge in understanding practical problems
CO-4	Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

1	Physical properties of foods, Ignacio Arana, CRC Press, Taylor and Francis Group, 2012
2	Food Biochemistry and Food Processing, Benjamin K. S., Wiley-Blackwell, London, 1983
3	Fennema, O.R. Ed. 1976. Principles of Food Science: Part-I Food Chemistry. Marcel Dekker, New York.
4	Functional foods and Nutraceuticals, Egbuna C. & Tupas G.D., Springer, 2020

REFERENCE BOOKS:

1	Food Chemistry, David Newton, Facts on File, Inc. New York, 2004
2	Belitz HD.1999. Food Chemistry. Springer, Verlag
3	Handbook of Nutraceuticals and Functional foods, 3 rd ED, CRC Press, Taylor and Francis Group,
4	FOOD The Chemistry of its Components, 5 th ED, RSC Publishing, 2009

Course Code: FT-422 (4CH)	Course Name: INSTRUMENTATION IN FOOD ANALYSIS
Pre-requisite: FT-412	Co-requisite: None

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Instrumentation in Food Analysis Relating to the M.Sc. in Food Science and Technology
PEO2	Analyse the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Nature and Concept of Food analysis, Basic instrumentation: Principle for pH meter, Dialysis	2
	Filtration and types, ultra filtration, Reverse osmosis	2
	Centrifugation: Principle, Theory (RCF, Sedimentation coefficient) and types of Rotors, Ultracentrifugation	2
	Calorimetry: Bomb calorimeter, Densimetry	1
	Refractometry	1
	Viscometers used in food industry.	1
2	Spectroscopic analysis of food components, Principle, instrumentation & application of Colorimetric (Hunter Lab colorimeter/ Munsell colorimeter/CIE-colour system).	2
	Principle, instrumentation & application of UV-Vis spectrophotometer & Spectro- fluometer,	2
	Principle, instrumentation & application of IR & Atomic Absorption Spectroscopy	2
	Principle, instrumentation & application of Mass spectroscopy	2
	Principle, instrumentation & application of NMR and ESR.	2
3	Chromatography: Theory & Principle, chromatographic parameter (partition coefficient, capacity factor, retention & dead time, Resolution & their calculation), components of chromatography & types (paper, thin layer, partition)	4
	Advance chromatography: GC, HPLC, HPTLC (principle, instrumentation & application). Separation technique & analysis	4
	Electrophoresis: Paper & gel electrophoresis, PAGE, iso-electric focusing, 2D electrophoresis, Immuno electrophoresis.	3
4	Isotopic & immune techniques: Principle & theory of isotopic method, types, measurement	2
	Detection of radioactivity, RIA, Autoradiography	3
	Immuno-techniques, Principle, antigen-antibody interaction, enzymatic immune assay- ELISA and its types.	3
	Different immune techniques of antigen detection in food sample.	2
	TOTAL LECTURES =	40

Course Outcomes

- CO-1** Remember and understand the basic concepts/Principles of **Instrumentation in Food Analysis**
- CO-2** Analyse the Various Concepts to understand them through case studies
- CO-3** Apply the knowledge in understanding practical problems
- CO-4** Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

- Food Analysis -Theory and Practice, Pomrenz Y & Meloan CE, 3rd Ed. CBS. 1996
- Food Analysis, S. Suzanne Nielsen, 3rd Ed. Kluwer Academic, New York, USA., 2003
- Wilson and Walker's Principles and Techniques of Biochemistry and molecular Biology, 8th edition, Hoffmann A. & Clokie S., Cambridge University Press, 2018
- Handbook of Food Analysis Instruments, Semih Ötles, CRC Press, Boca Raton, FL, USA. 2009.

REFERENCE BOOKS:

- Instrumental Methods of Food Analysis, Macleod AJ, Elek Sci. Marcel Dekker. 1973

2	Modern Techniques for Food Authentication, Da-Wen Sun, Elsevier Inc., Burlington, MA, USA. 2008
3	An Introduction to Practical Biochemistry. Plummer, D.T. 1971Mc-Graw Hill Pub.Co., New York.

Course Code: FT-423 (4CH)	Course Name: FOOD SAFETY AND QUALITY CONTROL
Pre-requisite: None	Co-requisite: None

Programme Education Objectives

PEO1 Understand the nature and basic concepts of **Food Safety and Quality Control** Relating to the **M.Sc. in Food Science and Technology**

PEO2 Analyse the relationships among different concepts

PEO3 Perform procedures as laid down in the areas of study

PEO4 Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Concept of quality: quality attributes: physical, chemical, nutritional and microbial evaluation.	3
	Objective evaluation: Tests used for objective evaluation, application and limit, Instruments used for quality assessment-color & gloss, size & shape, defects, texture, Viscosity & consistency	5
	Sensory evaluation: Sensory characteristics of food, sensory requirements, Types of sensory evaluation.	2
2	Food adulteration and food toxins: common adulterant in food (milk and milk products, edible oils, cereals & pulses, prepared foods, spices, beverages); simple screening, control of food adulteration	2
	Food Toxins: Terms in toxicology; Safety evaluation using traditional and modern approach;	2
	Natural anti-nutritional factors, toxic phytochemicals, microbial toxins, toxins from fungi,	2
	Contaminations during handling and processing (PAHs), contaminants from industrial wastes, pesticide residues	2
	Toxicity of heavy metals and chemicals in food and their permissible limits, Food allergens.	2
3	Quality assurance, Quality Control, Total Quality Management;	1
	GMP, GHP;	2
	GLP, GAP;	1
	Sanitary and hygienic practices;	1
	physical, chemical and biological hazards in foods,	1
	HACCP- Principles of HACCP, application of HACCP system, implementation steps for HACCP system;	2
	HACCP-systems for food safety,	1
	Quality manuals, documentation and audits.	1
4	Food laws and regulation: Mandatory and voluntary food laws,	1
	International quality systems and standards like ISO (9000 & 22000) series, Codex, BRC;	3
	Indian Food Acts-Food Safety and Standards Act, 2006, FTS Regulations: Regulations on Licensing and Registration, Regulations on Contaminants, toxins	3

	and residues, Food product standards, food additives, Laboratory and sampling analysis; Packaging and labelling; Prohibition and Restriction on sales.	
	Various food acts- Environment (Protection) Act, 1986, Standards of Weights and Measures Act, 1976, Essential Commodities Act, 1955, The Export (Quality Control and Inspection) Act, 1963, The Insecticides Act, 1968, Consumer Protection Act, 1986. Introduction to various food laws (Voluntary) -Agmark Standards (AGMARK), BIS Standards and Specifications.	3
	TOTAL LECTURES=	40

Course Outcomes

CO-1 Remember and understand the basic concepts/Principles of **Food Safety and Quality Control**

CO-2 Analyse the Various Concepts to understand them through case studies

CO-3 Apply the knowledge in understanding practical problems

CO-4 Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

1	Fundamentals of Quality Control for Food Industry, Krammer and Twigg, Avi Publishing Company, 1966
2	Handbook of Food Toxicology, S.S Deshpande, Marcel Dekker, 2002
3	Food Quality Assurance –Principles and Practices, Inteaz Alli, CRC Press Boca Raton
4	Food Hygiene and Sanitation, Roday S. McGraw Hill Education, 2011
5	An Introduction to Food Science Technology and Quality Management, Bhatt D.K. & Tomar P., Kalyani publishers.

REFERENCE BOOKS:

1	Sensory Evaluation Techniques, Civillie and Carr, CRC Press, 2015
2	Food Industry Quality Control System, Clute M., CRC Press, 2008
3	Food Safety Management and ISO 22000 –Food Industry Briefing, Early Ralph, Food Industry Briefing Publication
4	Food Safety and Standards Act, Rules & Regulations., Vidhi Jain & Akalank Kumar Jain

Course Code: FT-424 (4CH)	Course Name: FOOD PROCESSING TECHNOLOGY
Pre-requisite: None	Co-requisite: None

Programme Education Objectives

PEO1 Understand the nature and basic concepts of **Food Processing Technology** Relating to the **M.Sc. in Food Science and Technology**

PEO2 Analyse the relationships among different concepts

PEO3 Perform procedures as laid down in the areas of study

PEO4 Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Basic concept of food processing and preservation: Reason of food Spoilage and deterioration; Scope of food processing preservation; principles of food processing and preservation	2
	Principle and preservation by low temperature: (refrigeration, freezing, and dehydro freezing; cold storage, frozen food), changes during freezing-physical and chemical changes	3
	Processing and preservation by drying: factors affecting drying rate, types of dryers (kiln, tray, drum, spray, tunnel, fluidized bed drying),	3
	Types of drying technique (freeze drying, vacuum drying)	3
2	Processing and preservation by heat: (blanching, pasteurization, sterilization, UHT processing, heating, smoking, pickling, canning)	3
	Microwave cooking- (principle, changes during microwave cooking, advantages), difference between microwave and conventional heating; Retort thermal processing	3
	Concentration and evaporation- (flash evaporator, falling film evaporator and multiple effect evaporators), changes during Concentration	2
	Ohmic heating	2
3	Irradiation	1
	High pressure processing	2
	Pulsed electric field	1
	Ultrasonic processing: Properties of ultrasonic, application of ultrasonic as processing techniques	2
	IR heating, Minimal Processed food	1
	Hurdle technology: concept of hurdle technology and its application	2
4.	Food processing equipment: material handling, cleaning and grading, conveyors, size reduction	4
	Separation Technique: filtration (MF, UF, NF, RO), agitation and mixing.	2
	Baking, Frying	2
	Extrusion Technology (principle, types of extruders).	2
	TOTAL LECTURES =	40

Course Outcomes

CO-1	Remember and understand the basic concepts/Principles of Food Processing Technology
CO-2	Analyse the Various Concepts to understand them through case studies
CO-3	Apply the knowledge in understanding practical problems
CO-4	Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

1	Fellows PJ. 2005. <i>Food Processing Technology: Principle and Practice</i> . 4 th Ed. CRC.
2	Potter NN & Hotchkiss 1997. <i>Food Science</i> . 5th Ed. CBS
3	Sahay KM & Singh KK. 1994. <i>Unit Operation of Agricultural Processing</i> . Vikas Publ. House.

REFERENCE BOOKS:

1	Ramaswamy H & Marcotte M. 2006. <i>Food Processing: Principles and Applications</i> . Taylor & Francis
2	Wills, R.B.H., McGlasson, W.B., graham, D., Lee, T.H. and Hall, E.G. 1989. <i>Postharvest: An Introduction to the Physiology</i>

Programme Education Objectives

PEO1 Understand the nature and basic concepts of **Practical -III** Relating to the **M.Sc. in Food Science and Technology**

PEO2 Analyse the relationships among different concepts

PEO3 Perform procedures as laid down in the areas of study

PEO4 Apply the Basic Concepts learned to execute them

Course Outcomes

CO-1 Remember and understand the basic concepts/Principles of **Practical-III**

CO-2 Analyse the Various Concepts to understand them through case studies

CO-3 Apply the knowledge in understanding practical problems

CO-4 Execute/create the Project or field assignment as per the knowledge gained in the course

Programme Education Objectives

PEO1 Understand the nature and basic concepts of **Practical -IV** Relating to the **M.Sc. in Food Science and Technology**

PEO2 Analyse the relationships among different concepts

PEO3 Perform procedures as laid down in the areas of study

PEO4 Apply the Basic Concepts learned to execute them

Course Outcomes

CO-1 Remember and understand the basic concepts/Principles of **Practical-IV**

CO-2 Analyse the Various Concepts to understand them through case studies

CO-3 Apply the knowledge in understanding practical problems

CO-4 Execute/create the Project or field assignment as per the knowledge gained in the course

Programme Education Objectives

PEO1 Understand the nature and basic concepts of **Inter Disciplinary Course** Relating to the **M.Sc. in Food Science and Technology**

PEO2 Analyse the relationships among different concepts

PEO3 Perform procedures as laid down in the areas of study

PEO4 Apply the Basic Concepts learned to execute them

Course Outcomes

CO-1 Remember and understand the basic concepts/Principles of **Inter Disciplinary Course**

CO-2 Analyse the Various Concepts to understand them through case studies

CO-3 Apply the knowledge in understanding practical problems

CO-4 Execute/create the Project or field assignment as per the knowledge gained in the course

THIRD SEMESTER

Course Code: FT-511 (4CH)	Course Name: FOOD PRESERVATION AND PACKAGING
Pre-requisite: FT-424	Co-requisite: None

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Food Preservation and Packaging Relating to the M.Sc.in Food Science & Technology
PEO2	Analyse the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Food and its preservation, Food Preservation Past, Present and Future, Natural food hazards, Principles of Fresh and refrigerated gas storage of food.	2
	Preservation of Milk and Milk products.	2
	Preservation of fermented products.	2
	Preservation of Meat, Fish and Eggs.	2
	Preservation of Fruit Vegetables and Grains.	2
2	Factor affecting the self-stability of acid foods, alternative food preservation technology: efficacy and mechanism.	3
	Responsibility of Home makers in processing storage and preservation, food storage and processing for house hold food security.	2
	Elevating antioxidant levels in food through organic farming	1
	Food Security and Nutrition Packaging	2
	Nanotechnologies for Food Packaging	2
3	Packaging Fresh and Processed Food: Packaging requirement for different foods and processing methods,	1
	Various Packaging Types (paper, glass, metal container)	1
	Plastic Fabrication varieties, and trends; protective packaging of foods;	1
	Packaging of food products sensitive to oxygen, light, moisture; special problems in canned foods.	2
	Aseptic packaging, Modified Atmosphere Packaging (MAP), Controlled Atmosphere Packaging (CAP),	1
	Active packaging, Intelligent packaging	1
	Food Labelling and barcode technology	1
	Bio-degradable packages, aseptic and edible package, Recyclability of packaging material	2
4	Food packaging: Packaging material, Mass transfer in packing material	2
	Packaging system and methods-vacuum packaging, gas flush packaging, aseptic packaging	3
	Packaging of convenience foods; packaging of food products-fruits and vegetables;	5
	packaging requirements of fresh fruits and vegetables; packaging of fruit juices, spices, meat & poultry, fish, seafood; criteria for selection of proper packaging based on the shelf life desired, dairy product, beverages, cake and snacks food.	
	TOTAL LECTURES=	
		40

Course Outcomes

CO-1	Remember and understand the basic concepts/Principles of Food Preservation and Packaging
CO-2	Analyse the Various Concepts to understand them through case studies
CO-3	Apply the knowledge in understanding practical problems
CO-4	Execute/create the Project or field assignment as per the knowledge gained in the course

TEXTBOOKS:

1	Fellows PJ. 2005. <i>Food Processing Technology: Principle and Practice</i> . 4 th Ed. CRC.
2	Potter NN & Hotchkiss 1997. <i>Food Science</i> . 5 th Ed. CBS
3	Robertson, G.L. <i>Food Packaging: Principles and Practice</i> (2 nd ed.), Taylor & Francis 2006
4	Food storage and preservation, S.K. Ruth, NBI
5	Basic food science and technology, S.M Reddy, New age international pvt.ltd
6	Novel food packaging technology, Ahvenainen, CRC Press
7	Emerging technologies for food processing, Da-wen Aun, Elsevier

REFERENCE BOOKS:

1	Ramaswamy H & Marcotte M. 2006. <i>Food Processing: Principles and Applications</i> . Taylor & Francis
2	Wills, R.B.H., McGlasson, W.B., Graham, D., Lee, T.H. and Hall, E.G. 1989.
3	Food Packaging Technology Handbook. NIIR Board, National Institute of Industrial Research, 2003
4	Robertson, G.L. <i>Food Packaging: Principles and Practice</i> (2 nd ed.), Taylor & Francis 2006
5	Advances in meat, poultry and sea food packaging, WP Publication pvt.ltd, J.P. Kerry

Course Code: FT-512 (4CH)	Course Name: RESEARCH METHODOLOGY AND BIOSTATISTICS	
Pre-requisite: None	Co-requisite: None	

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Research Methodology and Biostatistics Relating to the M.Sc. in Food Science and Technology
PEO2	Analyse the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Research Methodology: Meaning, aim & objective of research, significance of research, Research types, Research methods vs methodology, Different types of research design. Different Steps in Writing Report, Technique of Interpretation, Precaution in interpretation, Significance of Report Writing, Layout of the Research Report.	3
	Fundamentals of statistics: Research process, Population, Variables, Primary and secondary data, Collection of data, Classification and tabulation of data, Need and usefulness of Diagrams & Graphs, Different types of diagrams and graphs (Bar charts, Histograms, Frequency polygons, one way scatter plots, Box plots, two way scatter plots, line graphs)	2
	Frequency distribution: Discrete and continuous frequency distribution, population & sample, Sample Size and its Determination	2

	Sampling Designs: Census and Sample Survey, Implications of a Sample Design, Steps in Sampling Design, Criteria of Selecting a Sampling Procedure, Characteristics of a Good Sample Design, Different Types of Sample Designs, sampling errors.	3
2	Descriptive statistics: Measure of central tendency: (Arithmetic mean, harmonic mean, geometric mean, median, mode), relation between mean, median and mode;	2
	Measure of dispersion: Range, Mean deviation & Standard deviation;	4
	Skewness and Kurtosis,	2
	Probability.	2
3	Testing of Hypotheses: Definition, Basic Concepts, Procedure for Hypothesis Testing, Measuring the Power of a Hypothesis Test, Normal distribution, data transformation, Null and Alternative Hypothesis, level of significance.	3
	Chi-square Test: Chi-square as a Non-parametric Test, Conditions for the Application Chi-square test, Steps Involved in Applying Chi-square Test	2
	Student's distribution and its application, „f“ test and its application,	1
	Analysis of Variance and Covariance: Analysis of Variance (ANOVA): Concept and technique of One-way ANOVA, Concept of Two-way ANOVA & Analysis of Co-variance (ANOCOVA)	4
4	Measures of Relationship: Need and meaning, Correlation and Simple Regression Analysis, Types of correlation; simple, partial and multiple correlation, Method of study & testing the significance of correlation coefficient.	3
	Regression analysis: regression equations and regression lines, Properties of regression lines, regression coefficient, testing the significance of regression coefficient.	2
	Concept of cluster Analysis and Principal component Analysis.	1
	Computer Application: Use of Computer in data analysis and research, Use of Software and Statistical package. Introduction to SPSS. Importing data from excel, access, entering data, labeling a variable, coding and recoding a categorical and continuous variable. Converting data from string to numeric variables, sorting & filtering, merging, appending data sets.	4
	TOTAL LECTURES =	40

Course Outcomes

CO-1 Remember and understand the basic concepts/Principles of **Research Methodology and Biostatistics**

CO-2 Analyse the Various Concepts to understand them through case studies

CO-3 Apply the knowledge in understanding practical problems

CO-4 Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

- 1 Zar, Jerrold H. (1998). Biostatistical Analysis, Prentice Hall, NJ
- 2 Statistics for Management, Levin and Rubin, Owls Books, Toledo, USA
- 3 Business Mathematics and Statistics, N.K.Nag & S.K.Nag, Kalyani publishers.
- 4 Handbook on Data Envelopment Analysis, Cooper, Seiford, Lawrence & Zhu, Springer

REFERENCE BOOKS:

- 1 Statistical Methods – S.P.Gupta, Sultan Chand & Sons Publisher- New Delhi
- 2 Research Methodology, Methods and Techniques – C.R. Kothari Wiley Eastern Limited – New Delhi

Course Code: FT-513 (4CH)	Course Name: INDUSTRIAL FERMENTATION TECHNOLOGY
Pre-requisite: FT-413	Co-requisite: None

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Industrial Fermentation Technology Relating to the M.Sc. in Food Science and Technology
PEO2	Analyse the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Fermentation and Industrial Microbiology: Upstream processing: media for industrial fermentation-submerged and solid-state fermentation. sterilization, development of inoculum for fermentation. Screening techniques-primary and secondary, strain improvement of industrially important microorganisms.	4
	Introduction to fermentation processes- Bioreactor design, types and components of fermenter- agitation, aeration, pH, temperature, dissolved oxygen- control and monitoring. Different types of fermenters	3
	Techniques of Downstream processes - recovery and purification- filtration, centrifugation. Purification of intracellular and extra cellular products- Chromatography and Distillation.	3
2	Brief account of industrial production of beer, bread, industrial alcohol, vinegar and acetic acid, Cheese by microorganisms. Production of amino acids, Production of antibiotics, Production of food colorants, Production of beta carotene, Production of baker "s yeast, Production of microbial enzymes and its importance- protease, alpha- amylase, Immobilization of enzymes.	5
	Effluent Treatment Plants and Solid Waste Utilization and Management – SCP, Biogas and vermi- composting	2
	Utilization of-agricultural waste (cereal, legume and oil seed-based waste), dairy waste, fruit and vegetable waste, meat, poultry, egg and fish wastes, by-products of fermentation industries, Sugar and bakery industry.	3
3	Enzyme classification, Properties, Characterization, Fermentative production of enzymes. Enzymes for starch modification (maltodextrins and corn syrup solids: liquefaction, saccharification, dextrinization, isomerization for production of high-fructose-corn-syrup, fructose and fructo-oligosaccharides)	4
	Enzymes for protein modification Enzymes for Lipid modification	3
4.	Role of enzymes in Dairy processing Role of enzymes in fruit and vegetable processing	3
	Role of enzymes in Brewing, Baking (fungal-amylase for bread making; maltogenic- amylases for anti-staling; xylanases and pentosanases and dough conditioners; lipases or dough conditioning; oxidases as replacers of chemical oxidants; synergistic effect of enzymes)	6
	Role of enzymes in the production of flavours (enzyme-aided extraction of plant materials for production of flavours, production of flavour enhancers such as nucleotides)	4
	TOTAL LECTURES =	40

Course Outcomes

CO-1	Remember and understand the basic concepts/Principles of Industrial Fermentation Technology
CO-2	Analyze the Various Concepts to understand them through case studies
CO-3	Apply the knowledge in understanding practical problems
CO-4	Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

1	Genetics. Strickberger M W. Prentice, Hall of India, Pvt Limited, New Delhi.
2	Industrial Microbiology, Casida LE, Wiley, 1968
3	Microbial Biotechnology: Fundamentals of Applied microbiology - Hiroshi Nikaido, Alexander N Glazer
4	Biotechnology -Expanding Horizons, B.D. Singh, Kalyani Publishers, New Delhi. 2014

REFERENCE BOOKS:

1	Introduction to Plant Biotechnology. Second Edition. Science Publishers. Chawla HS.
2	Utilization of By-Products and Treatment of Waste in the Food Industry. Oreopoulou V and Russ W. Springer, 2007.
3	Principles of Gene Manipulation and Genomics, S.B. Primrose and R.M. Twyman, 7thEd. , Blackwell Publishing, Victoria, Australia, 2006
4	Whitehurst,R.J. & Van-Oort,M., (2010), Enzymes in Food technology, Second edition, Blackwell Publishing Ltd
5	Aehle, W. (2007) Enzymes in Industry: Production and application. Wiley-VCH Verlag GmbH & Co. KGaA, Weinheim
6	Rastall,R (2007) Novel enzyme technology for food applications Woodhead Publishing Limited, Abington Hall, Abington, Cambridge CB21 6AH, England
7	Kalaichelvan, P.T., (2002), Bio process technology, MJP publishers, Chenna
8	Basic food science and technology, S.M Reddy, New age international publication

Course Code: FT-514 (4CH)	Course Name: Beverages and Baking Technology
Pre-requisite: None	Co-requisite: None

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Beverages and Baking Technology Relating to the M.Sc. in Food Science and Technology
PEO2	Analyse the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Types of beverages and their importance	1
	Synthetic beverages; technology of still, carbonated, low-calorie and dry beverages	1
	Manufacturing technology for juice-based beverages	3
	Isotonic and sports drinks, Role of various ingredients of soft drinks	1
	carbonation of soft drinks	1

	Specialty beverages based on tea, coffee, cocoa	3
	Dairy and imitation dairy-based beverages	1
2	Alcoholic beverages- types, manufacture and quality evaluation; the role of yeast in beer and other alcoholic beverages, ale type beer, lager type beer, technology of brewing process, equipment used for brewing and distillation	4
	Wine fermentation and related beverages	2
	Distilled spirits (Rum, Whisky, Brandy, Vodka)	1
	Packaged drinking water- definition, types, manufacturing processes, quality evaluation and raw and processed water, methods of water treatment, BIS quality standards of bottled water, Types: mineral water, flavored water, carbonated water.	3
3	Bakery products: Batter and dough-based products, role of bakery ingredients	1
	Bread manufacturing process (straight and sponge dough method), bread faults (staleness, ropiness, retrogradation of starch), quality evaluation of dough and bread,	3
	manufacturing process of cookies, crackers, biscuits, cakes (and its types), pizza, pastry, noodles, pasta, vermicelli	3
	Confectionary products- high boiled sweets, toffee, fondant, tablets, lollipop, jellies, Lozenges, sugar panning and Chewing gum, <i>savoury</i> and <i>farsans</i>	3
4	Technology for grain-based snacks: whole grains: coated grains-salted, spiced and sweetened, papads, instant premixes of traditional Indian snack foods	2
	Technology for fruit and vegetable-based snacks: Chips, Chikki	2
	Technology for coated nuts – salted, spiced and sweetened	1
	Extruded snack foods: Formulation and processing technology, colouring, flavouring and packaging	2
	Blending, frying, baking, toasting, puffing and flaking	3
	TOTAL LECTURES =	40

Course Outcomes

CO-1	Remember and understand the basic concepts/Principles of Beverages, Bakery and Snacks Food Technology
CO-2	Analyse the Various Concepts to understand them through case studies
CO-3	Apply the knowledge in understanding practical problems
CO-4	Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

1	Fellows P. 1988. <i>Food Processing Technology</i> . VCH Ellis Horwood.
2	Alan H. V & J. P. Sutherland, Springer International Edition
3	Samuel AM.1976. <i>Snack Food Technology</i> . AVI Publ.
4	Pyler EJ. <i>Bakery Science & Technology</i> .3rd Ed. Vols.I, II.Sosland Publ.

REFERENCE BOOKS:

1	Hui YH. <i>et al</i> 2004. <i>Handbook of Food and Beverage Fermentation Technology</i> . Marcel Dekker
2	Gordon BR.1997 <i>Snack Food</i> .AVI Publ
3	Woodroof JG & Phillips GF.1974. <i>Beverages: Carbonated and non-carbonated</i> . AVI Publ.
4	Francis FJ. 2000. <i>Wiley Encyclopedia of Food Science & Technology</i> . John Wiley& Sons.

Programme Education Objectives

PEO1 Understand the nature and basic concepts of **Practical -V** Relating to the **M.Sc. in Food Science and Technology**

PEO2 Analyse the relationships among different concepts

PEO3 Perform procedures as laid down in the areas of study

PEO4 Apply the Basic Concepts learned to execute them

Course Outcomes

CO-1 Remember and understand the basic concepts/Principles of **Practical-V**

CO-2 Analyse the Various Concepts to understand them through case studies

CO-3 Apply the knowledge in understanding practical problems

CO-4 Execute/create the Project or field assignment as per the knowledge gained in the course

Programme Education Objectives

Each MSc Food Science and Technology student shall present a seminar on a topic relevant to their field of study, chosen in consultation with faculty. The objective of the seminar is to cultivate critical thinking, enhance literature review skills, and improve the ability to communicate scientific information effectively to a peer and expert audience. Through this course, students will develop competencies in data interpretation, oral presentation, and academic writing. The seminar provides a platform to engage with current developments in food science, nutrition, food safety, or industrial practices, fostering both subject mastery and professional readiness.

Course Outcomes

CO-1 **Demonstrate the ability to review and critically analyze scientific literature.**

CO-2 **Formulate and present coherent scientific arguments through oral and visual communication.**

CO-3 **Exhibit improved academic and professional communication skills.**

CO-4 **Engage in scholarly discussion and respond effectively to questions and feedback.**

CO-5 **Integrate knowledge from diverse areas of food science and technology**

FOURTH SEMESTER

Course Code: FT-521 (4CH)	Course Name: Agri Food Handling
Pre-requisite: FT-511	Co-requisite: None

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Agri Food Handling Relating to the M.Sc. in Food Science and Technology
PEO2	Analyse the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Post-harvest Technology: Importance, principles & scope of post-harvest treatments.	3
	Pre-harvest factors that affect post-harvest quality	2
	Respiration: Factor effecting respiration rate, Losses: causes of post-harvest losses, Diseases: Physical damage, Minimizing Losses	2
	Maturity: Maturity indices for harvesting crops, Handling: Techniques for crop harvesting, foods and vegetables harvesting	2
	Post harvest technology for cereals (cleaning, grading, milling), Hydrothermal treatment & conditioning of grains. Modern paddy Crop drying methods/systems and Crop dryers-selection. and parboiling-systems, equipment.	3
2	Post-harvest of fruits & Vegetables: physiological and biochemical changes in fruits and vegetables;	3
	Ripening of climacteric and non-climacteric fruits, Artificial ripening process.	2
	Physiological post-harvest disorders - chilling injury and disease;	2
	Prevention of post-harvest diseases and infestation;	2
	Handling and packaging of fruits and vegetables; factors affecting post-harvest losses; Standards and specifications for fresh fruits and vegetable.	3
3	Wheat and corn milling process	3
	Post harvest technology for legumes (cleaning, grading, milling)	3
	Post harvest technology for oilseeds (cleaning, grading, milling), Oil extraction	3
4	Processing: Importance of post-harvest processing, Quality, Nutritional content, Sensory attribute	2
	Different types of storage and preservation techniques for minimizing the post- harvest losses.	2
	Value added product development: Intermediate Moisture Foods, Tomato Products, Drying and Dehydration of Fruits and Vegetables products, Beverages.	3
	TOTAL LECTURES =	40

Course Outcomes

CO-1	Remember and understand the basic concepts/Principles of Agri Food Handling
-------------	--

CO-2	Analyze the Various Concepts to understand them through case studies
CO-3	Apply the knowledge in understanding practical problems
CO-4	Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

1	Unit operations of Agricultural Processing, Sahay and Singh, Viraj publishing House Pvt. Ltd.
2	Thompson AK. 1995. <i>Post Harvest Technology of Fruits and Vegetables</i> . Blackwell Sci.
3	Robertson, G.L. Food Packaging: Principles and Practice (2nd ed.), Taylor & Francis 2006
4	Han, J.H. (Ed.) Innovations in Food Packaging, Elsevier Academic Press, 2005

REFERENCE BOOKS:

1	Lal G, Siddapa GS & Tandon GL.1986. <i>Preservation of Fruits and Vegetables</i> . ICAR.
2	Verma LR. & Joshi VK. 2000. <i>Post Harvest Technology of Fruits and Vegetables</i> . Indus Publ.
3	Ahvenainen, R., Novel Food Packaging Techniques, CRC Press, 2003
4	Food Packaging Technology Handbook. NIIR Board, National Institute of Industrial Research, 2003
5	Coles, R., McDowell, D. and Kirwan, M.J. (Eds.) Food Packaging Technology, CRC Press, 2003

Course Code: FT-522 (a) (4CH)	Course Name: Nutrition and Dietetics
Pre-requisite: FT-414	Co-requisite: None

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Nutrition and Dietetics Relating to the M.Sc. in Food Science and Technology
PEO2	Analyse the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Therapeutic Nutrition: Therapeutic adoption of normal diets (normal, soft & fluid diets) factors to be considered in planning therapeutic diets, role of dietician, Dietary calculation using food exchange lists, high & low-calorie diet, high protein, high fat, & low carbohydrate diets.	10
2	Therapeutic Diets: Etiology, physiological disturbances, biochemical & clinical Manifestations & dietary management of: Fever & infection.	4
	Therapeutic Diets: Etiology, physiological disturbances, biochemical & clinical Manifestations & dietary management of: Allergy, burn and trauma complication and diet treatment	4
	Therapeutic Diets: Etiology, physiological disturbances, biochemical & clinical Manifestations & dietary management of: HIV, AIDS and cancer.	2
3	Therapeutic Diets: Etiology, physiological disturbances, biochemical & clinical Manifestations & dietary management of: Obesity, underweight and eating disorder.	4
	Therapeutic Diets: Etiology, physiological disturbances, biochemical & clinical Manifestations & dietary management of: diabetes mellitus.	3
	Therapeutic Diets: Etiology, physiological disturbances, biochemical & clinical Manifestations & dietary management of: GI Disease and disorders	3

4	Therapeutic Diets: Etiology, physiological disturbances, clinical & biochemical manifestation and dietary management of cardio vascular disorder. Arthrosclerosis (fat-controlled diet) heart disease, Hypertension, Coma. Therapeutic Diets: Etiology, Physiological disturbances, biochemical & clinical Manifestations & dietary management of: Liver and Pancreas, cirrhosis (High protein, high carbohydrate, moderate fat or fat restricted diet) pancreatitis, and cholelithiasis. Therapeutic Diets: Etiology, physiological disturbances, biochemical & clinical manifestations & dietary management of: Diseases of kidney (Nephrosis, nephro sclerosis, glomerular nephritis, uremia) CKD and K, Na diet.	10
TOTAL LECTURES =		40

Course Outcomes

CO-1	Remember and understand the basic concepts/Principles of Nutrition and Dietetics
CO-2	Analyse the Various Concepts to understand them through case studies
CO-3	Apply the knowledge in understanding practical problems
CO-4	Execute/create the Project or field assignment as per the knowledge gained in the course

TEXT BOOKS:

1	Nutrition and Dietetics – Subhangini A.Joshi – Tata McGraw-Hill Publishing Company Limited, New Delhi
2	Dietetics – B.Srilakshmi – New age international (P) limited New Delhi.
3	Clinical Dietetics and Nutrition – F.A. Antia, Oxford University Press, London.
4	Text Book of Human Nutrition- Mahtab S. Bamji, N.Rao & V. Reddy, Oxford & IBH Publishing Co. Pvt. Ltd.

REFERENCE BOOKS:

1	Normal and Therapeutic nutrition- C.H. Robinson & M.R Lawler – Macmillen Publishing Co. New York.
2	Essentials of Food and nutrition – M.Swaminathan, Vol I & II, The Bangalore Printing & Publishing Co.Ltd (BAPPCO)
3	Food, Nutrition & Diet Therapy-L.K.Mahan & Escott.Stump- W.B. Saunders Ltd
4	Nutrition& Diet Therapy- S.R.Williams-Times mirror Mosby college Publishing. Co.
5	Human Nutrition & Dietetics- J.S.Garrow ,W.P.T.James, A. Ralph –Churhill Livingstone

Course Code: FT-522 (b) (4CH)	Course Name: Waste Utilization in Food Industry
Pre-requisite: None	Co-requisite: None

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Waste Utilization in Food Industry Relating to the M.Sc. in Food Science and Technology
PEO2	Analyse the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Food pollution; pesticide residue in food, nitrates in food, irradiation in food, microbial contamination in food poisoning Environment and Pollution: Components of environment; Environmental pollutions, its measurements and management.	10
2	Animal food waste and treatment; Seafood processing waste, meat and poultry waste, Dairy processing waste	10
3	Plant food waste and treatment; Potato waste-water, Cereal, pulse and edible oil waste	4
	Soft Drink waste treatment and Bakery waste treatment	3
	legal aspects related to storage and disposal; environmental laws and regulations.	3
4	Utilization of Waste: Methods of utilizing wastes to make value added products	3
	CASE STUDIES: Pectin, food colorants, antioxidants from fruit peels (citrus, mango, and pomegranate), lycopene from tomato peels, vegetable seed oils, biomolecules and enzymes from meat processing	4
	Generation of biogas, SCP, microalgae, animal feeds, zero emission plants	2
	Recovery & recycling of materials	1
	TOTAL LECTURES =	40

Course Outcomes

CO-1	Remember and understand the basic concepts/Principles of Waste Utilization in Food Industry
CO-2	Analyse the Various Concepts to understand them through case studies
CO-3	Apply the knowledge in understanding practical problems
CO-4	Execute/create the Project or field assignment as per the knowledge gained in the course

Course Code: FT-523 (4CH)	Course Name: Nutraceuticals and Functional Foods	
Pre-requisite: None	Co-requisite: None	

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Nutraceuticals and Functional Foods Relating to the M.Sc. in Food Science and Technology
PEO2	Analyse the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Nutraceuticals and functional Foods –Definition, concept, history and market	2
	Classification of nutraceuticals and functional foods. Nutraceutical and functional food applications, their health benefits and management of diseases and disorders (cancer, heart disease, diabetes, obesity, anti-aging, arthritis).	4
	Natural occurrence of certain phytochemicals- Antioxidants and flavonoids: omega – Omega 3 and omega 6 fatty acids, Isoflavones, phenolic compounds, catechins, lycopene, glucosinolates, carotenoids, dietary fiber.	4
2	Prebiotics, probiotics and symbiotics- Probiotics: Definition, types and relevance; Usefulness in gastro intestinal health and other health benefits.	4
	Development of a probiotic products; recent advances in probiotics; Challenges and regulatory issues related to probiotic products.	4
	Prebiotics: Prebiotic ingredients in foods; types of prebiotics and their effects on gut microbes; health benefits of prebiotics; recent development in prebiotics. Symbiotic.	2
3	Food fortification with vitamins and mineral nutraceuticals; Nutrient addition to food, Principles of fortification.	3
	Micronutrient fortification technology, Stability of fortificants.	3
	Functional foods - Definition, development of functional foods, use of bioactive compounds in appropriate form with protective substances and activators: trends and issues, Future scope.	4
4	Effect of environmental condition and food matrix; Effects of processing conditions and storage.	3
	Packaging, Storage, labelling: Packaging requirements, storage and storage kinetics on quality of nutraceuticals, interactions of various environmental factors. Marketing and safety aspects.	2
	Development of biomarkers to indicate efficacy of functional ingredients	1
	Research frontiers in functional foods; delivery of immunomodulators /vaccines through functional foods.	3
	Nutrigenomics- concept of personalized medicine.	1
	TOTAL LECTURES=	40

Course Outcomes

CO-1	Remember and understand the basic concepts/Principles of Nutraceuticals and Functional Foods
CO-2	Analyse the Various Concepts to understand them through case studies
CO-3	Apply the knowledge in understanding practical problems
CO-4	Execute/create the Project or field assignment as per the knowledge gained in the course

Course Code: FT-524 (4 CH)	Course Name: PROJECT WORK / DISSERTATION
Pre-requisite: None	Co-requisite: None

Programme Education Objectives

PEO1	Understand the nature and basic concepts of Project Work / Dissertation Relating to the M.Sc. in Food Science and Technology
PEO2	Analyse the relationships among different concepts
PEO3	Perform procedures as laid down in the areas of study
PEO4	Apply the Basic Concepts learned to execute them

1. Basic concepts of project planning

- Defining objectives- Need, problem, project, feasibility, planning, formulation. - . Identifying resources
- Methods/approaches,

2. Guideline for project writing –

Title of the project - Name of the person - Duration of the project, type of project. – Aims and objectives - summary of the proposed project - Project information, location, people and personnel involved. - Working/methodology – Evaluation - Writing and reporting

3. Internship Tenure– 6months-

After successful completion of the course the candidate is eligible to undergo 6months internship in the following departments.

Modules for Project Work:

- Drying and Dehydrations of fruits and vegetables
- Fruits and Vegetable Products
- Beverages and other Innovative Products
- Spice Products
- Postharvest management and marketing of Fresh Fruits and Vegetables
- Egg, Poultry and Meat Processing
- Bakery Products
- Grain based Products (Cereal, Legumes/pulses and oilseeds)
- Chocolate, Confectionary and Snack
- Products 10. Milk and Milk products
- Processing of Fish and Fish Products
- Functional Foods and Nutraceuticals
- Innovative Food Packaging

A Good Project should have:

- Originality, Innovation and creativity and should commensurate with understanding the problem and finding solution.
- Relevance of the project to the community and impact of the project on society.
- Proper understanding of the subject, quality and quantity of the work and efforts to validate the data collected.

Project Report Writing:

The structure of the project report shall be in the format is as follows:

- The Cover Page-
It should have
• Title of the project

- Name and address of department
- Name and address of Supervisor/Guide/ teacher
- ii) Abstract -500 words
- iii) Contents:
 - List of tables/figures
 - Abbreviations
- iv) Introduction-Description on background of the study
- v) Aims and Objectives
- vi) Relevance of the project work
- vii) Methodology
- viii) Observations: This shall include the observations during the experiment. Observation can be both qualitative as well as quantitative.
- ix) Data analysis and interpretation: The data generated/ obtained from the experiments/observations should be processed for better understanding in a more structured manner. Tools and methods (e.g. statistical methods) may be used for analyzing data to understand the patterns that emerges from it to form results and conclusions.
- x) Results: Results are the output of compilation of the data into meaningful outcomes/ interpretations and sometimes, there is a need to redo the experiments to get consistent results. In case it is not possible to “repeat the experiments”, there should be adequate replicates so that adequate data is available for interpretation, and arriving at results.
- xi) Conclusions: This is the logical end of the project to arrive at specific conclusions from the observed phenomena. In a way, the whole objective of the project is to arrive at some conclusion, either positive or negative which would lead to a better understanding of the problem.
- xii) Acknowledgement
- xiii) References

Evaluation shall be done by external members. Students should be assigned marks for project report based on following Criteria:

Sl.No	Topics	%Marks
1	Originality of Idea and Concept	5
2	Relevance of the project to the theme/problem	5
3	Data collection and analysis	10
4	Research Plan and Methodology	10
5	Experimentation/ execution of research work	10
6	Research Report Writing	30
7	Oral Presentation	20
8	Clarification of queries raised	20
	Total=	100

The word „Project“ essentially means that learning and development are achieved through personally determined experience and involvement, rather than on received teaching or training, typically in group, by observation, study of theory or hypothesis, bring in innovation or transfer of skills or knowledge. Experiential learning during project work is a business curriculum-related endeavour which is interactive.

Course Outcomes

- | | |
|-------------|---|
| CO-1 | Remember and understand the basic concepts/Principles of Project Work / Dissertation |
| CO-2 | Analyse the Various Concepts to understand them through case studies |
| CO-3 | Apply the knowledge in understanding practical problems |
| CO-4 | Execute/create the Project or field assignment as per the knowledge gained in the course |

Course Code: FT-523 (2CH)	Course Name: INDUSTRIAL TOUR REPORT
Pre-requisite: None	Co-requisite: None

Programme Education Objectives

PEO1 Understand the nature and basic concepts of **Industrial Tour Report** Relating to the **M.Sc. in Food Science and Technology**

PEO2 Analyse the relationships among different concepts

PEO3 Perform procedures as laid down in the areas of study

PEO4 Apply the Basic Concepts learned to execute them

Industrial Tour should be compulsorily carried out by students at least for 1 day. The Industrial Tour should be planned to make students acquaint with different sectors of Food Processing Industries (viz. Bakery, fruits and vegetables, snacks, meat processing, etc). The students should be shared with the details of industries being visited to and given an assignment to collect the basic details of the types of products and technicalities related to it.

Formats for Study Tour or Educational Tour Report and For Its Evaluation:

1. Name of the student:
2. Reg. No and Roll No:
3. Name of the plant (address):
4. Period of Tour:

Place	Date and Time	Organization	Learning Outcomes

Evaluation shall be done by members. Students should be assigned marks for Industrial Tour based on following Criteria:

Sl.No	Topics	%Marks
1	Tour report Evaluation	50
2	Technical knowledge related to products	20
3	Presentation of Tour Report with Pictures in	30

Course Outcomes

CO-1 Remember and understand the basic concepts/Principles of **Industrial Tour Report**

CO-2 Analyse the Various Concepts to understand them through case studies

CO-3 Apply the knowledge in understanding practical problems

CO-4 Execute/create the Project or field assignment as per the knowledge gained in the course

Course Code: FT-526 (2 CH)	Course Name: VIVA - VOCE
Pre-requisite: None	Co-requisite: None

Programme Education Objectives

At the end of the fourth semester, MSc Food Science and Technology students will undergo a comprehensive viva voce examination encompassing their dissertation or project work on research contributions, industry exposure, and hospital internship experience. This multi-dimensional evaluation is intended to assess the students' understanding of scientific principles, practical applications, professional skills, and the ability to integrate theoretical knowledge with real-world settings. The viva will be conducted by a panel comprising internal and external examiners to ensure

objectivity and academic integrity. This final assessment not only emphasizes research proficiency but also highlights students' readiness for careers in academia, industry, and clinical nutrition environments, making it a critical component of their academic journey.

Course Code: MOOC	Course Name: MOOC Alternative Course (DAIRY TECHNOLOGY)
Pre-requisite: None	Co-requisite: None

Programme Education Objectives

PEO1 Understand the nature and basic concepts of **MOOC** Relating to the **M.Sc. in Food Science and Technology**

PEO2 Analyse the relationships among different concepts

PEO3 Perform procedures as laid down in the areas of study

PEO4 Apply the Basic Concepts learned to execute them

Student should opt in 2nd or 3rd semester as per available from online platforms like- SWAYAM, IGNOU, CONSORTIUM FOR EDUCATIONAL COMMUNICATION, NPTEL etc. Evaluation shall be done by examination. Students should be assigned marks for the same.

Course Outcomes

CO-1 Remember and understand the basic concepts/Principles of MOOC

CO-2 Analyse the Various Concepts to understand them through case studies

CO-3 Apply the knowledge in understanding practical problems

CO-4 Execute/create the Project or field assignment as per the knowledge gained in the cours

Course: MOOC	Course Name: MOOC Alternative Course (DAIRY TECHNOLOGY)
---------------------	--

Programme Education Objectives

PEO1 Understand the nature and basic concepts of **Dairy Technology** Relating to the **M.Sc. in Food Science and Technology**

PEO2 Analyze the relationships among different concepts

PEO3 Perform procedures as laid down in the areas of study

PEO4 Apply the Basic Concepts learned to execute them

UNIT	TOPICS	NO. OF LECTURES
1	Present status of milk & milk products in India and Abroad; market milk-Composition Of milk of various species, Physiochemical properties, difference evaluation, defects in dried milk powder.	3
	Quality evaluation and testing of milk, procurement, transportation and processing of Market milk, cleaning & sanitization of dairy equipment	3
	Special milks such as flavored, sterilized, recombined & reconstituted toned & double Toned.	4
2	Cream- Definition, classification, composition, cream separation, sampling, neutralization, sterilization, pasteurization & cooling of cream, evaluation, defects in cream	4
	Butter-Definition, composition, classification, methods of manufacture, theories of churning, evaluation, defects in butter	4
	Ice-cream-Definition, composition and standards, nutritive value, classification, methods Of manufacture, evaluation, defects in ice-cream, and technology aspects of softy manufacture.	2

3	Condensed milk-Definition, methods of manufacture, evaluation of condensed & Evaporated milk	3
	Dried milk Powder-Definition, methods of manufacture of skim & whole milk powder, instantiation	3
	Cheese: Definition, composition, classification, methods of manufacture, cheddar, Gouda, cottage and processed cheese, evaluation, defects in cheese.	3
	Pre-biotic and pro biotic milk products.	1
	TOTALLECTURES=	30
