'emission-free' Indiathe government has come to implement a new agenda by accommodating sustainable cities, transforming the use of petrol and diesel, and developing eco-friendly technologies in recent decades whichacknowledge both national and international significance after 2014. For the better delivery of sanitation servicesin cities, villages, and street areas, the policymakers are also putting their best effortat institutional levels. India also wanted to adopt a significant agenda that is completely based on revised and rectified defects in earlier environmental laws. In this capacity, the study focuses on the importance of Modi's environmental governance frameworkalong withhis pioneering role to address the problem of environmental issues through political interventionat the same timewith the help of different working agencies to deal with them.

The core problem with research work is that the making of environmental policy in the case of India has been currently startedunder the NDA-led Modi government during his nine years of premiership, particularly from 2014 to 2022. This period is recognized as the 'new environmental governance' phase as it indicates some fresh government initiatives, policy-decision, and future-based action plansunder the ruling government. Further, it will hope that government willdeliver a new theoretical and practical texturein the context of India's environmental governance process. Apart from sustainable development goals, the green economy model, and renewable energy policy come under the recent development agenda that the government has specifically started to meet environmental uncertainties and ongoing climate events in India's cities. Studyingit critically also provides an in-depth analysis of the contentious aspects of Modi's India. environmental governance in Based ontwo questions; Can India will bring out the right policy structure wherethe environment will maintain economic development and industrialization with a balance growthbasedagenda? how the politics of 'privatization, development, and deregulation' has emerged in the name of new environmental policy? Does the Modi government have misused the power of environmental laws? be the central concerns of analysis.

Progress of Research Work

National and International Seminars/Conferences

Working toward the first chapter of my research work and collecting data for the rest of the work.

 Attended and presented a research paperat a national seminar on "Making Modi Agenda on Climate Issue: The Strategy of Policy Adaptation and Mitigation" organized by the School of

	Political Science G.M. Universityon the title of "Understanding Climate Change in India: Issue and Challenges". • Attended and presented a research paper at a national seminar on "Environmental Security Agenda in India: A Study under Modi Government" organized by the School of Political Science G.M. Universityon the title of "Debating National Security in India: A Human Security Perspective".
National and International Workshop/Webinar	 Participated in Three Days international Virtual Workshop on <i>Thesis Writing and Publication</i> jointly organized by Lavender Literary Club, India, Cape Comorin Trust from 23-25 March 2023. Participated in "<i>Research Methodology Course for Research Scholar in Social Science</i>" conducted online and sponsored by the Indian Council of Social Science Research (ICSSR) and Organised by Council of Social Development (CSD) Hyderabad from 12.09.2022 to 23.09.2022.
