

Model Curriculum for Three/Four Year Degree Course

Bachelor Degree

(Hons/With Research) in Geography

(With Multiple Entry /Exit Option)

(w.e.f.: 2024-25)

Based on NEP-2020

Geography

Bachelor Degree (Hons/With Research)

SESSION – 2024-27

Sambalpur University

Jyoti Vihar, Sambalpur

Contents

1. Structure and Regulation.....
2. Core Courses (4 Credits each).....
 - a. Major: Core-I (15 courses total in all semesters)
 - b. Minor: Core-II (3 courses in ODD Semester) & Core – III (3 courses in Even Semester)
3. Multidisciplinary Courses.....

(3 courses to be chosen from *baskets of Multidisciplinary* for Semester-I/II/III with 3 credits each). *Students are advised to opt for courses outside their discipline*)
4. Ability Enhancement Courses.....

(Odia and English are the compulsory courses under Semester-I/II respectively with 4 Credits each)
5. Skill Enhancement Courses (SEC).....

(3 courses to be chosen from *baskets of SEC* for Semester-I/II/III respectively with 3 credits each)
6. Value Added Courses.....
 - a. *Environmental Studies and Disaster management compulsory under Semester-I with 3 Credits*
 - b. 3 courses to be chosen from *baskets of VAC* for Semester-III/IV/VI with 3 credits each
7. Summer Vocational Course

(Students may choose vocational courses after 2nd Semester and 4th Semester for Certificate Course or Diploma Course respectively with 4 credit each opt for exit)

Course Structure

	Major		Minor (Only for Students other than Geography Major)				Multidisciplinary (Only for Students other than Geography Major)		AEC		SEC		VAC		Community Engagement and Services /Field Work/Internship	Total Minimum Credit
	Core I	Credit	Core II	Credit	Core III	Credit	Multidisciplinary	Credit								
I	Paper I-Physical Geography	4	Paper I. Physical Geography	4			Sustainable Eco Tourism	3	Odia	4			Environmental studies and disaster management	3		22
	Paper II-Human Geography	4														
II	Paper III-Population Geography	4			Paper I. Physical Geography	4	Climatology	3	English	4	Yoga in everyday life	3				22
	Paper IV-Cartography and Geo-Spatial Techniques	4														
															Total	44
	Exit Option with Undergraduate Certificate Course in Geography on completion of courses equal to minimum 44 credits + ## Summer Internship (Vocational Course 1) ##															
III	Paper V-Environmental and Bio Geography	4	Paper II-Human	4			Oceanography						Understanding Odisha	3		22

	Major		Minor (Only for Students other than Geography Major)				Multidisciplinary (Only for Students other than Geography Major)		AEC	SEC	VAC	Community Engagement and Services /Field Work/Internship		Total Minimum Credit	
	Core I	Credit	Core II	Credit	Core III	Credit	Multidisciplinary	Credit							
	Paper VI-Quantitative Techniques	4	Geography					3							
	Paper VII-Economic Geography	4													
IV	Paper VIII-Remote Sensing and GIS	4			Paper II-Human Geography	4						Community Engagement & Services/Field Work/Internship	4	20	
	Paper IX-Geomorphology	4													
	Paper X-Evolution of geographical thought	4													
												Total		42	
	Exit Option with Undergraduate Diploma in Geography on completion of courses equal to minimum 86 credits + ## 4 credit skill-based course ½ Summer Terms) ##														
V	Paper XI-Regional Planning and Development	4	Paper III- Populati	4							Personality Devel	3	Understanding India	3	22

	Major		Minor (Only for Students other than Geography Major)				Multidisciplinary (Only for Students other than Geography Major)		AEC	SEC	VAC	Community Engagement and Services /Field Work/Internship	Total Minimum Credit
	Core I	Credit	Core II	Credit	Core III	Credit	Multidisciplinary	Credit					
	Paper XVIII-Natural Resource Management and Geo informatics	4											
	Paper XIX-Human Development and Sustainable Development	4											
VIII	Paper XX-Geospatial Modelling, Artificial Intelligence and Machine Learning	4	Paper V-Geography of Odisha	4									20
	Paper XXI-Field Survey: Tools and Technique	4											
	Paper XXII-Political Geography and Globalization	4											
	Paper XXIII-Social and Cultural Geography	4											
												Total	40

	Major		Minor (Only for Students other than Geography Major)				Multidisciplinary (Only for Students other than Geography Major)		AEC		SEC		VAC		Community Engagement and Services /Field Work/Internship		Total Minimum Credit
	Core I	Credit	Core II	Credit	Core III	Credit	Multidisciplinary	Credit									
Grand Total	23X4=92		5X4=20		3X4=12		3X3=9		2X4=8		3X3=9		4X3=12		1X4=4		166
Award of Four-Year Bachelor's Degree (Honors) in Geography without research on completion of courses equal to a minimum of 166 credit																	
B. Fourth Year Hons. with Research																	
VII	Paper XVI- Research Methodology	4	Paper IV- Geogr aphy of India	4													20
	Paper XVII- Natural Hazards and Disaster Management	4															
	Paper XVIII- Human Development and Sustainable Development	4	Paper V- Geogr aphy of Odisha	4													
VIII	Paper XIX- Geospatial Modelling,	4													Research	12	20

	Major		Minor (Only for Students other than Geography Major)				Multidisciplinary (Only for Students other than Geography Major)		AEC		SEC		VAC		Community Engagement and Services /Field Work/Internship		Total Minimum Credit
	Core I	Credit	Core II	Credit	Core III	Credit	Multidisciplinary	Credit									
	Artificial Intelligence and Machine Learning														Project/ Dissertation: Dissertation		
	Paper XX- Political Geography and Globalization	4															
Total																40	
Grand Total	20X4=80		5X4=20		3X4=12 2		3X3=9		2X4=8		3X3=9		4X3=12		16	166	
Award of Four-Year Bachelor’s Degree (Honors) in Geography with research on completion of courses equal to a minimum of 166 credit																	

Note:

- One credit is equivalent to one hour of lecture or tutorials or two hours of practical work/field work per week in a semester. One Credit will be generally equivalent to 15 hours of instructions.
- Each semester shall comprise of 15 weeks of academic activities with a minimum of 90 working days.

Credit for different classes			
Credit	Theory	Tutorial	Practical/Field Work
1	1 Hour	1 Hour	2 Hours

Evaluation:

**Distribution of Marks in Semester End
and Continuous**

**Evaluation:(Irrespective of credit in a
course/Paper)**

Course Type	Maximum Marks	Semester End Theory Marks	Continuous Evaluation Marks / Sessional	Mid Semester Theory Marks	Semester End and Practical Marks	Mid Semester Practical Marks
Without Practical	100	60	20	20	----	----
With Practical	100	50	10	10	20	10

Distribution of Sessional Marks:

Course Type	Maximum Marks	Mid Semester	Attendance	Surprise Test / Quiz	Assignment / Presentation
Without Practical	40	20	Above 95% - 5 Marks	10	05
With Practical	30	(Theory 10 + Practical 10) = 20	85%-94% - 4 Marks 75%-84% - 3 Marks	05	Nil

Programme Outcomes

1. Upon program completion, graduates will proficiently analyze and comprehend various global geographical challenges, adeptly proposing viable solutions.
2. Integral to the learning journey, students will develop foundational expertise in spatial analysis techniques, encompassing Remote Sensing and GIS methodologies.
3. Through adept training, students will master the art of effectively conveying geographical concepts, data, and discoveries, employing an array of suitable tools and methodologies.
4. They will grasp the intricate interdependencies between human societies, cultures, and their surrounding environments, fostering a holistic understanding of geographical dynamics.
5. Graduates will emerge equipped with essential fieldwork and research proficiencies, enabling them to craft and execute meticulous geographical field studies, harness spatial data for analysis, and adeptly interpret findings to advance geographic comprehension and knowledge.

COURSE STRUCTURE OF UG GEOGRAPHY (MAJOR) UNDER NEP-2020				
Semester	Course Code	Course Name	Credit	Full Marks
I		Physical Geography	4	100
		Human Geography	4	100
II		Population Geography	4	100
		Cartography and Geo-Spatial Technique	4	100
III		Environmental Geography and Biogeography	4	100
		Quantitative Techniques in Geography	4	100
		Economic Geography	4	100

SYLLABUS OF UG GEOGRAPHY (MAJOR) UNDER NEP -2020

Semester-I

PHYSICAL GEOGRAPHY

Core I Paper I

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit- I:

Learning Outcome:

Comprehend the fundamentals of geomorphic processes, landforms, climate systems, and hydrology, enabling them to analyze and explain the interconnectedness of these elements within global ecosystems

Meaning, scope, and components of physical geography, Interior of the Earth; Origin of continents and oceans; Isostasy; Earthquakes and volcanoes; Earth movements; Faults, folds; Continental Drift and Plate Tectonic Theories; ; Cycle of erosion: Davis and Penck; Weathering and Mass Wasting.

Unit-II:

Learning Outcome:

Gain comprehensive understanding of the Earth's atmospheric structure, composition, and characteristics, and be able to analyze and interpret climate patterns, factors influencing climate, and the impact of climatic changes on various ecosystems and human societies.

Elements of weather and climate; Structure and composition of atmosphere. Insolation and heat budget, vertical and horizontal distribution of temperature; Atmospheric pressure and winds- Air mass, Frontogenesis, Tropical Cyclone and Origin; and mechanism of Monsoon.

Unit-III:

Learning Outcome:

Acquaint themselves with thorough understanding of the hydrological cycle, the movement and distribution of water across terrestrial and marine systems, allowing them to ocean bottom topography, ocean temperature and salinity, ocean currents, and sediment deposits.

Hydrological Cycle: Factors affecting run-off, infiltration and groundwater. Water Storage and Circulation; Ocean bottom topography; Temperature and salinity of ocean water; Ocean current and deposits.

Unit-IV: (Practical) Learning Outcome:

Honed their fieldwork and laboratory skills, enabling them to apply physical geographic methods to collect, analyze, and interpret data from real-world environments.

proficient in representing relief features such as Mountains, Valleys (U shaped and V shape), Waterfalls, Plateaus, and

1. Drawing of Contour Features – Mountain, Valley (U shaped and V shape), Waterfall, Plateau and Escarpment;
2. Calculation of time of place with reference to GMT;
3. Introduction to use of simple weather observation instruments: Thermometer (Wet and dry bulb temperature), Barometer, hygrometer, anemometer, wind vane, Rain Gauge, Stevenson Screen,
4. Interpretation of weather maps; Construction and interpretation hydrographs and unit hydrographs; T-S Diagram.
5. Practical Record and Viva.

Suggested Readings:

HUMAN GEOGRAPHY

Core I Paper II

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I:

Learning Outcome:

Analyse the complex relationships between humans and their physical and social environments. Identify and analyze the key concepts of human geography and its evolution.

Meaning, Nature and Scope of Human Geography; Its Contemporary Relevance; Major Themes and concepts of Human Geography (Location, Place, Region and Movement, Accessibility, Agglomeration, Mental Map, Space, Space-time continuum, Landscape, Regionalism, Topophilia and topophobia, Diffusion, and Distribution) Man-nature inter-relationship (Determinism, Possibilism and Neo-determinism), Development of human geography- contributions of Germans, French and Americans.

Unit - II:

Learning Outcome:

Understand patterns and processes of population growth and its implications. Demonstrate cultural awareness and sensitivity in understanding diverse race, religion, linguistic, ethnicity and cultural practices and beliefs that shape human geography and their implications for society.

World Distribution of racial, religious, linguistic and ethnic groups; Evolution of Culture and Cultural realms of the world; World Population Growth, Population Problems. Global cultural diversities- diffusion of culture.

Unit-III:

Learning Outcome:

Understand types and patterns of human settlement and its dynamism. understand different forms of inequalities.

Types and Patterns of Rural Settlements; Concept and Classification of Urban Settlements; World Urbanization with special reference to developing countries, Salient Features of cultural globalization. Regional diversity and disparity (Gender, Ethnicity and Income).

Unit-IV: Practical Learning Outcome:

Design and implement research projects related to human geography, including the collection, analysis, and interpretation of data related to socio-cultural and economic status of local/regional ethnic communities. Communicate complex ideas related to human geography to a range of audiences, both orally and in writing.

Project Report and Presentation on

1. Socio-cultural and economic status of any ethnic group in India.
Or
2. Evolution of the settlement where you live/local settlement.

- ✓ Rubenstein, James M. (2022) *Contemporary Human Geography*, Pearson, U.S.A

Semester -II
Population Geography

Core I Paper III

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit- I:

Learning Outcome:

Explain meaning, scope and development of population geography as a distinct branch of Geography

Defining the Field, Nature and Scope of population geography; Sources of population data with special reference to India (Census, National Family Health Survey and NSS); Demographic Balancing Equation; Population Distribution and Growth – Measures, Factors, and World Patterns; Concept of Doubling Time, Concepts of Rate, Ratio and Proportion.

Unit- II:

Learning Outcome:

Understand key concepts, different components of population along with its drivers

Population Dynamics: Fertility, Mortality and Migration - Measures, Determinants and Implications; Theories of Population Growth – Malthusian Theory, Optimum Population Theory and Demographic Transition Theory; Population Resource Regions.

Unit-III:

Learning Outcome:

Examine population dynamics and resultant socioeconomic issues and problems.

Population Composition and Characteristics – Age-Sex, Rural-Urban, Literacy, Occupational Structure; Contemporary Population Issues – Population Ageing, Declining Child Sex Ratio, HIV/AIDS; Population problems and policies in Developed and Developing countries with Special reference to India.

Unit-IV: Practical

Learning Outcome:

compare and relate population growth and distribution of developed and developing countries

1. Estimation of Population Growth
2. Arithmetic and Geometric Projection calculation and graphical display
3. Population distribution maps using symbols – Simple and Multiple Dots, Circles and Spheres
4. Construction of Lorenz Curve
5. Construction of Population Pyramid
6. Practical Record and Viva-Voce

Suggested Readings:

Reference Books:

- ✓ Chandna, R. C. (2015). *An Introduction to Population Geography*, Kalyani Publishers.
- ✓ Clarke, J. I. (1965). *Population Geography*, Pergamon Press, Oxford.

Suggested Readings:

- ✓ Barrett, H. R. (1995). *Population Geography*, Oliver and Boyd.
- ✓ Bhende, A. and Kanitkar T. (2000). *Principles of Population Studies*, Himalaya Publishing House.
- ✓ Hassan, M.I (2020). *Population Geography: A Systematic Exposition*, Routledge, London and New York.
- ✓ Jones, H. R. (2000). *Population Geography*, 3rd ed. Paul Chapman, London.
- ✓ Newbold, K. B. (2009). *Population Geography: Tools and Issues*, Rowman and Littlefield Publishers.
- ✓ Pathak, K.B and F. Ram (2016). *Techniques of Demographic Analysis*, Himalaya Publishing House, Mumbai.
- ✓ Maurya, S. D. (2017). *Population Geography*, Sharda Putak Bhawan, Allahabad.
- ✓ Srinivasan, K (1998). *Basic Demographic Techniques and Applications*, Sage Publications, New Delhi.

Core I Paper IV

Cartography and Geo-Spatial Techniques

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I:

Learning Outcome:

Develop the ability to design and produce effective and aesthetically appealing maps using modern cartographic techniques and software. They will understand principles of cartographic design, color theory, and typography to create maps that convey spatial information clearly and accurately.

Scientific basis of Cartography, needs of map making, characteristics of maps, Geographical Coordinates (Latitude and Longitude), Graticules, types of Scales (Plain, and Diagonal Scale.)

Unit-II

Learning Outcome:

Acquire knowledge in selecting and applying appropriate map projections for representing geographical data accurately, as well as mastering the skills to create and interpret dip strike maps to analyze geological structures effectively.

Meaning, Uses and types of Map Projection, Transformation of area, Distance and Direction, Choice of map projection, Interpretation of Bedding plane, Strike, Dip, structure & stratigraphy of Geological map, methods of determination of slope (Wentworth's method and Smith).

Unit-III

Learning Outcome:

Gain proficiency in using GIS software to capture, store, manipulate, and analyze geospatial data. They will learn how to integrate various data layers, perform spatial queries, and create interactive maps to solve real-world geographical problems.

History of Geographical Information System, Components of GIS, Dimensions of GIS data- Conceptual (field/object) and logical (raster/vector), Data sources, data types (raster/vector/attribute), History of Remote Sensing, Types of Platform, Sensor characteristics, Aerial photographs and Visual interpretation of Satellite images, Global Positioning System (GPS) and Global Navigation Satellite System (GNSS), Applications of GIS and RS.

Unit-IV: Practical

Learning Outcome:

Acquire hands-on cum practical skills in using modern cartographic tools and geospatial technologies to create visually compelling maps and effectively analyze spatial data for various applications in geography, environmental studies, and other related fields.

1. Construction of Graphical, RF & Statement Scale, Diagonal Scale

2. Construction of Map Projections: Cylindrical and Conical Projection with one and two standard parallels and Zenithal.
3. Drawing of Choropleth and isopleth maps,
4. Slope Analysis (Wentworth's method).
5. Identification and mapping of water bodies from satellite imageries
6. Digitization of map and drawing of few point, line and polygon features.
7. Practical record and viva-voce

Suggested Readings:

Text Books:

Semester-III

Core I Paper V Environmental Geography and Biogeography **(4 Credit, Theory: 45hrs, Practical: 30hrs)**

Unit-I:

Learning Outcome:

Understand the concept of the environmental ecosystem, their types, structure, and functions, again they can also get a clear idea about biogeochemical cycles including Carbon, Oxygen, Nitrogen cycle etc.

Environment: Concept, Types and Characteristics and Principles; Environmental Controls and Concept of tolerance; Ecosystem: Concept, Types, Structure and Functions (Food Chain and Food Web, Trophic Level, Ecological Pyramid); Energy flow in Ecosystem; Bio-geo-chemical Cycles (Nitrogen, Carbon, Oxygen); Concept and Types of Biomes: (Equatorial, Subtropical, Temperate and Polar).

Unit-II

Learning Outcome:

Recognize the spatial aspects of biodiversity including the processes, dynamics, and distributions. They also get an idea about the different biodiversity including critical, endangered, and threatened and their related issues.

Introduction to Biogeography: Nature, Scope, Development; Ecological Succession: Succession, Change and Equilibrium; Key processes in Biogeography: Evolution, Speciation, Extinction, Dispersal; World Distribution patterns of Biota: Biogeographical Regions; Distribution of World's Biodiversity hotspots: Critical and Endangered, Threatened, relatively stable/intact.

Unit-III:

Learning Outcome:

Gain the basic knowledge about pedology, including, the origin of soil, factors affecting soil formation, elements of soils and classification of soil on the basis of different criteria.

Soil Colour, Soil Texture and Soil Structure; Soil horizons; Soil forming Processes and Factors; Soils Classification: (a) Soil Classification by Maturity (Entisols, Inceptisols, Alfisols, Spodosols, Ultisols, Oxisols), (b) Soil Classification by Climate (Mollisols, Ardisols, Gelisols), (c) Soils Characterized by Parent Material (Vertisols, Andisols).

Unit-IV: Practical

Learning Outcome:

Students will realize the extension of different biomes and Man-Environment relationship in different biomes.

1. Submission of a Project Report on any environmental problem of global/national/local significance.

Or

2. Prepare a Seminar paper on biodiversity hotspots of India with special reference to the distribution, biotic characteristics, major threats, and possible solutions.
3. Report and Viva-Voce

Suggested Readings:

Text Books:

- ✓ Chandna R. C. (2002). *Environmental Geography*. Kalyani, Ludhiana.
- ✓ Singh S. (1997). *Environmental Geography*. Prayag Pustak Bhawan. Allahabad.

Reference Books:

- ✓ Cunningham W. P. and Cunningham M. A., (2004). *Principles of Environmental Science: Inquiry and Applications*, Tata Macgraw Hill, New Delhi.
- ✓ Goudie A. (2001). *The Nature of the Environment*. Blackwell, Oxford.
- ✓ Huggett, R. John. (1998). *Fundamentals of Biogeography*. Routledge.
- ✓ Miller, G. T., (2004). *Environmental Science: Working with the Earth*. Thomson Brooks Cole, Singapore.
- ✓ Odum, E. P. et al, (2005). *Fundamentals of Ecology*. Ceneage Learning India.
- ✓ Sharma P.D. (2005). *Ecology and Environment*. Rastogi Publications, Meerut, UP.
- ✓ Strahler, A. (2013). *Introduction to Physical Geography*. Sixth Edition, Wiley.

Core I Paper VI

Quantitative Techniques in Geography

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I:

Learning Outcome:

Understand the nature and scope of Quantitative Techniques in Geography.

Data Processing in Geography: Sources of Data, Tabulation of data, Scales of Measurements in Geography, Frequency Distribution, Data Matrix. Sampling Methods: Probability and non-probability sampling, Types of Sampling (Simple Random, Systematic, Stratified and Purposive)

Unit-II:

Learning Outcome:

Acquire skills to handle Statistical Techniques in Geography

Descriptive Statistics: Central Tendencies – Mean, Median, Mode; Measures of Partitions - Quartile, Decile, Percentile; Measures of Dispersion- Standard Deviation and Coefficient of Variation, analysis of variance; Measures of inequality. Theoretical Distribution: Concept of Probability Distribution (Theoretical only), Normal Distribution – Characteristics, Area under Normal Curve. Relationship Analysis:

Unit-III:

Learning Outcome:

Apply the acquired skills to solve Statistical problems in Geographical Studies.

Correlation - Spearman's and Karl Pearson's coefficient of correlation; Simple Regression, test of significance. Logistic regression, multivariate factor analysis & Discriminate function analysis

Unit-IV: Practical

Learning Outcome:

Proficiently apply quantitative methods and statistical techniques to analyze and interpret geographical data, enabling them to make well-informed and evidence-based decisions in various geographical contexts.

1. Drawing of histogram, frequency curve and ogive in grouped and discrete data.
2. Calculation & drawing of graphs showing mean, median, mode in grouped and discrete data.
3. Calculation of mean deviation, standard deviation and coefficient of variation.
4. Calculation Rank correlation, Product moment correlation and Simple linear Regression
5. Practical Record and Viva-Voce.

Core I Paper VII

Economic Geography

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I:

Learning Outcome:

Understand and differentiate different types of economic activities and their utilities. Analyse the factors responsible for the location and distribution of economic activities.

Meaning and scope of economic geography; classification of economic activities; Factors affecting location of Economic Activity with special reference to agriculture, manufacturing and Services; Classification of world agricultural system of Whittlesey. Von Thunen theory of location of agricultural activity.

Unit-II

Learning Outcome:

Evaluate the significance and relevance of theories in relation to the location of different economic activities.

Secondary Activities: Manufacturing (Cotton Textile, Iron and Steel, Petrochemical), Major Industrial Regions of the world, Special Economic Zones and Technology Parks. **Tertiary Activities:** Transport (Land, Air, Water and Pipelines), Trade (National and International) ; Weber and Smith's Industrial location Theory.

Unit-III:

Learning Outcome:

Define and differentiate types of resources, their management and sustainable use.

Resource - Concept and Classification, Functional Theory of Resources, Distribution, Utilization, Problems and Management of World's Resources (Land, Water, Forest and Energy (Coal, petroleum and non-conventional), Mineral resources (Iron, Bauxite). Resource Development Regions of India; Resource depletion, conservation and Sustainable use of resources.

Unit-IV: Practical

Learning Outcome:

Create different types of thematic maps, charts and diagrams.

1. Determination and representation of agricultural efficiency (Kendall and Bhatia method).
2. Method of delineation of crop combination regions by Weaver and Doi's method.
3. Traffic flow diagram and Drawing of Isochrones, Isotims, Isodapanes.
4. Practical Record and viva –voce.

Suggested Readings:

Text Books:

Semester-IV

Core I Paper VIII

REMOTE SENSING AND GIS

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I:

Learning Outcome:

Understand the nature and scope of GIS and RS vis a vis conventional Maps.

Sources and characteristics of spatial data: Maps vs RS images, Concept of Remote Sensing, Meaning and significance of EMR Spectrum, Elements of a RS image: Pixel, Digital Number (DN), Band, Resolution of Remote sensing data; Visual Interpretation of Aerial Photograph and Satellite imagery.

Unit-II

LO: apply the acquired skills to spatial problem solving situations and evaluate their efficacy over other methods.

Abstraction and representation of Spatial Data: Data Models in GIS, Vector Data Model, Types and Components of Vector data, Attribute data Management, Query of Spatial and non-spatial Data, Processing and Analysis of Vector Data, Geoprocessing, Overlay Analysis

Unit-III

Learning Outcome:

Able to interpret and analyze various satellite images and decode the information.

Working with Continuous spatial Data: Nature and processing of Raster Data, Various Gridded Data Sources and application, DEM, Interpretation of Remote Sensing images: Visual and Digital interpretation, Supervised and Unsupervised classification, LULC classification, NDVI, Accuracy assessment, Facility Information System using spatial data, Various other applications: Land Use planning, disaster management etc.

Unit-IV: Practical

Learning Outcome:

Acquire of skills to handle popular GIS and RS softwares to process and analyse spatial data

1. Visual Image Interpretation;
2. Vectorisation: digitisation, attribute data query, SQL;
3. Geoprocessing: Buffering, Union, intersection, merge, dissolve;

4. Subsetting and mosaicking Images, Indices, Image enhancement Rectification,
5. Image classification- supervised and unsupervised, accuracy assessment.
6. Report and Viva-Voce

Suggested Readings:

Text Books:

Core I Paper IX

Geomorphology

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I

Learning Outcome:

Apply theoretical knowledge of geomorphology to real-world scenarios: demonstrate the ability to analyze and interpret various landforms and geological features in the field, applying geomorphic principles to understand their formation processes and evolutionary history.

Applied Geomorphology: Nature, Scope and significance; **Principles of Geomorphology**; Modern techniques in geomorphology and their application- Profile, Hypsometry, Altimetry and Clinographic Drainage Basin: Network Characteristics, Morphology, Phases of drainage network development; Major Landforms (Fluvial, Aeolian, Glacial, Karst and Coastal)

Unit-II

Learning Outcome:

Assess and mitigate geomorphic hazards and to identify potential geomorphic hazards, such as landslides, erosion, and riverbank failures, and develop effective strategies to mitigate risks and protect communities and infrastructure in vulnerable areas.

Environmental Geomorphology: Meaning and Application; Natural hazards and environmental management; Geomorphic hazards: Volcanic, Earthquakes, Landslide and Floods; Anthropogenic activities and their effects on erosion and sedimentation. Urban geomorphology: Study of previous terrain of the cities; Application in urban planning. Concept of economic geomorphology.

Unit-III

Learning Outcome:

Evaluate human impacts on geomorphic processes and landforms and will examine the influence of human activities on the Earth's surface, including construction, mining, and deforestation, and assess their effects on geomorphic processes and long-term landform evolution.

Case Studies in Applied Geomorphology: Geomorphic application in soil studies; Geomorphology and Disaster Management; Geomorphology in engineering construction: Construction of large dams, roads, tunnels, and their impact; Coastal Geomorphology and Management; Land Degradation and Restoration; sustainable Geomorphological Practices;

Unit IV: Practical

Learning Outcome:

Design sustainable land use and development plans: Through integrating geomorphological data and analysis, learner will be equipped to propose and implement sustainable land use and development plans that consider geomorphic factors, ensuring long-term environmental stability and minimizing adverse impacts on landscapes and ecosystems.

1. Practical methods for geomorphic field surveys and data collection. Conducting field survey for collection data at different geomorphic settings
2. Hands-on experience with topographic maps, aerial photographs, and GPS for landform identification.
3. Utilizing remote sensing data and geographic information systems (GIS) for landform mapping and analysis
4. Digital terrain modeling and visualization of geomorphic features.
5. Drainage Morphometry: delineation of watershed, stream ordering; Morphometric analysis: mean stream length, drainage density and drainage frequency.
6. Integrating geomorphic data and analysis into land use planning for sustainable development.
7. Report and Viva- Voce

Suggested Readings:

Core I Paper X

Evolution of Geographical Thought

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit - I

Learning Outcome:

Students will have specialized knowledge on the contribution of ancient and medieval geographers to the real character of geography.

Geographical concepts of ancient and medieval period: Contributions of Greek, Roman , Indian and Arab scholars.

Unit-II

Learning Outcome:

Students will have improved knowledge on systematic and regional approaches in geography.

Modern period: Contributions of Alexander Von Humboldt, Carl Ritter, Ratzel, Vidal De La Blache and Mackinder.

Unit-III:

Learning Outcome:

Students will have greater understanding about different schools of thoughts enriching the subject matter of geography.

Dichotomy and dualism in Geography– Environmental Determinism and Possibilism, Systematic and Regional Geography, Ideographic and Nomothetic, Physical and Human Geography. Recent Trends in Geography– Quantitative Revolution, Behaviouralism and Radicalism.

Unit-IV: Practical

Learning Outcome:

Students will have greater understanding through report writing and seminar presentation on various geographical perspectives, approaches and methods from ancient classical period to the present scenario.

Submission of Project Report and Presentation on any of the following:

1. Analysis and Comparison of areas of geographical works between Classical Greek vs Roman Geographers.
2. Analysis of different perspectives in historical development of geographical thinking in the modern period.
3. Analysis of different perspectives, approaches and methods involved in the advancement of geographical thinking in recent times.
4. Report and Viva-Voce.

Suggested Readings:

Text Books:

Semester-V

Core I Paper XI

REGIONAL PLANNING AND DEVELOPMENT

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-1

Learning Outcome:

Understand regional dynamics and can delineate the boundary of different regions.

Concept of Region, Types of regions: Formal, Functional and Planning Region, Need for Regional Planning, Characteristics of an Ideal Planning Region and delineation of Formal and Functional regions. Planning Regions; Approaches and Methods.

Unit-II

Learning Outcome:

Understand the theories and models associated with regional planning at global and local level.

Theories and Models for Regional Planning: Growth Pole Model of Perroux; Myrdal, Hirschman, Rostow, Export Base Model, Core-Periphery Model and Modified Growth Foci approach of R.P.Mishra.

Unit-III

Learning Outcome:

Acquainted with different type's plans associated with urban and rural planning as well as their method of preparation.

Regional Disparity and Imbalances in India, Strategies for balanced regional development in India through Policies and Programmes in FYPs, concept and characteristics of city master plan, NCR Planning, Decentralised planning in India: District Plan and Multi Level Planning in India, Formulation and function of Niti Ayog, Development planning skills, Welfare program of different sectors, Special Component plan: Tribal Sub Plan and Weaker Section plan Allocation and Principles and Methods of participatory planning.

Unit-IV: Practical

Learning Outcome:

Plan, manage and deliver the end quality product required by the country in the field of regional planning, at various levels and in various areas.

1. Regional Disparity based on socio-economic indicators at C.D Block/ Tehsil / District/ state by range equalization/ Z-Score method and prepare choropleth maps.
2. Practical record and viva-voce.

Suggested Readings:

Text Books:

- ✓ *Misra, R.P. (1992) Regional Planning: Concepts, techniques, Policies and Case Studies. Concept, New Delhi.*
- ✓ *Chand, M and Puri V.K. (1983). Regional planning In India, Allied Publishers, New Delhi.*

Core I Paper XII**Geography of Odisha**

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I:**Learning Outcome:**

Understand the locations, physiography, climatic conditions, and distribution of soils in Odisha.

Geological Structure: Distribution of Major Rock Systems; Physiographic Divisions; Factors Influencing Climate of Odisha; Climatic Regions; Major Soil Types; Natural Vegetation.

Unit-II

Learning Outcome:

Acquaint themselves with thorough understanding of the demographic structure

Growth, Distribution and Density of Population; Population Composition: Linguistic, Rural-Urban; Distribution of Cities and Towns; Regional Variation in Folk Housing Types in Rural Odisha; Processes and Dynamics of Migration in Odisha.

Unit-III

Learning Outcome:

Familiar with the socio-cultural activity in Odisha.

Geographical Factors Behind Odisha's History and Culture; Evolution of Odia Language and Regional Variations; Diversity of Tribes and Social Formation; Regional Variation of Food Preferences and Habits; Folk and Popular Odia Cultures; Identifying Vernacular Cultural Regions of Odisha.

Unit-IV

Learning Outcome:

Understand economy and Natural Disaster of Odisha.

Major Farming Types; Industrial Belts of Odisha; Cottage and Handicraft Industries of Odisha; Fisheries: Fresh and Marine; Aspirational districts and other major welfare schemes, Natural Disaster and Odisha (Cyclone, Flood): Risk and Vulnerability; Paradigm Shifts in Disaster Management: Success Stories of Odisha.

Suggested readings:

Text Books:

Core I Paper Core XIII Climatology and Oceanography
(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I:

Learning Outcome:

Acquaint with the overview of the fundamental concepts of Earth's climate and weather system.

Weather: Stability and instability, barotropic and baroclinic conditions; Inversion of temperature: types, causes and consequences; Condensation: Process and forms. Mechanism of precipitation: Bergeron-Findeisen theory, collision and coalescence. Forms of precipitation;

Unit-II

Learning Outcome:

Understand the basic thermodynamic concepts for the atmosphere related to atmospheric stability and cloud formation, and to be able to explain weather phenomena

Air mass: Typology, origin, characteristics and modification; Fronts: Warm and cold, frontogenesis and frontolysis; Circulation in the atmosphere: Planetary winds, jet streams, index cycle; Monsoon circulation and mechanism with reference to India; Climatic classification-Koppen and Thornthwaite. Overview of climate change: Warm and cold climatic phases; Greenhouse effect. Formation, depletion and significance of the ozone layer.

Unit-III

Learning Outcome:

To demonstrate a systematic, extensive, and coherent knowledge and understanding of the ocean and atmospheric system, its manifestations, variability and change, and their applications and implications for society

Major relief features of the ocean floor: Characteristics and origin according to plate tectonics; Physical and chemical properties of ocean water; Ocean temperature and salinity: Ocean circulation, wave and tide; Distribution and determinants; Coral reefs: Formation, classification and threats; Marine resources: Classification and sustainable utilization; Sea level change: Types and causes.

Unit-IV: Practical

Learning Outcome:

Equipped with relevant skills in the field of ocean and atmospheric sciences, along with a critical thinking of the established theories, latest developments, and ability to use modern state-of-the-art techniques for observations and analyses

Measurement of weather elements using analogue instruments: Mean daily temperature, air pressure, relative humidity, rainfall; Construction and interpretation of hythergraph and climograph (G. Taylor); Construction and interpretation of wind rose; Construction and interpretation of rating curves

Suggested Readings:

Text Books:

- ✓ Critchfield, H. J. (2010). *General Climatology*. Prentice Hall India Ltd.
- ✓ Lal, D.S. (2013) *Climatology and Oceanography*. Sharda Pustak Bhawan, Allahabad.

Semester-VI

P Core I Paper XIV

Geography of India

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I:

Learning Outcome:

Understand the locations, physiography, climatic conditions, and distribution of soils in India.

Physiography divisions of India, Himalayan and Peninsular rivers, watershed and interlinking rivers, India's Climatic classification by Koeppen and Trewartha, Mechanism of Indian monsoon, Soils: distribution and characteristics of major soil groups.

Unit-II**Learning Outcome:**

Acquaint themselves with thorough understanding of the Indian Agriculture and regional disparities in agricultural development.

Agricultural regionalization-Agro climatic zones, regional disparities in agricultural development, Govt. Schemes related to Agriculture; Green revolution, white, blue revolution and its socio economic cum ecological implications. Joint Forest Management, Social forestry, Conventional and non-conventional sources of energy, Energy Crisis and Conservation, Biosphere reserves and National Parks.

Unit-III**Learning Outcome:**

Familiar with the Industries, industrial policy and transport networks of India.

Industries: Types and classifications, Factors of location and development of jute, Tea, Paper, Fertilizer and IT industries, Industrial policies in India, SEZs, Transport system of India: Roadways, Railways, Ports, Inland waterways, Airways and Pipeline network, Growing importance of ports in national and foreign trade.

Unit-IV**Learning Outcome:**

Understand the regional development and planning and political Aspects of India.

Experience of regional planning in India: Five year plans; integrated rural development programmes; Panchayati Raj and decentralized planning; Command area development; Watershed management; planning backward area, desert, drought-prone, hill tribal area development, Multi-level planning, Geographical basis of Indian federalism, State reorganization, Emergence of new states, Regional consciousness and inter-state issues, International boundary of India and related issues.

Suggested readings:**Text Books:**

- ✓ Khullar, D. R. (2018). *India: A Comprehensive Geography*. New Delhi: Kalyani

Publishers.

- ✓ *Deshpande C. D. (1992). India: A Regional Interpretation. ICSSR, New Delhi.*

Core I Paper XV

URBAN GEOGRAPHY **(4 Credit, Theory: 45hrs, Practical: 30hrs)**

Unit-I:

Learning Outcome:

Get an idea about development of urban Geography and its relevance.

Concept of Urban, Urbanization and Urbanism; Nature and scope of urban geography; Urban geography: a sub discipline (evolution); Classification of towns and cities: Census (Census vs. statutory towns) and functional classification (million plus cities, metropolitan, megalopolitan, cosmopolitan, compact city, virtual city, network city, world class city, global city, inclusive city, sustainable city and concept and planning of smart city).

Unit-II:

Learning Outcome:

Understand the concepts and critically recent concepts in urban geography

Origin and evolution of urban settlements; Hierarchy of urban settlements; concept of urban region; slum: a unique character of Indian cities, concept of ghettoization and gentrification; Urban public places; Peri-urban: concept, challenges and opportunities; unequal cities; urban planning, policy and governance.

Unit-III:

Learning Outcome:

Comprehend the emerging patterns of urban settlements and related issues

Models of Internal Structure of the City-Burgess, Hoyt, Harris and Ullman; Central Place theory of Christaller; Trends and patterns of urbanization in World and India; Urbanization: problems and opportunities; Recent urban changes.

Unit-IV: Practical

Learning Outcome:

To ensure the practical knowledge on urban geography.

1. Calculate the applicability of Law of Primate City and Rank Size Rule in the context of India.
2. Analyse the trends of urban growth in Odisha by using census data.
3. Identify the major cities of Odisha (Class I) and local urban centres of your concern district in the Odisha map.

Suggested Readings:

Text Books:

- ✓ Alan Latham, Derek McCormack, Kim Mcnamara, Donald Mcneill. 2009. *Key concepts in urban geography*. Sage.
- ✓ Michael Pacione. 2009. *Urban Geography: a global perspective*. Routledge.

Semester-VII

CoreI Paper XVI

Research Methodology

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit -I

Learning Outcome:

The learners will get the initial training on various steps involved in geographical research.

Research in Geography: Meaning and significance; Need for research; Types of research; Research Design; Defining research problems; Development of theoretical background- literature review, identifying research gap and research questions and objectives of study; Hypothesis building; Framework of research writing; research ethics.

Unit -II**Learning Outcome:**

They will develop the idea on fundamentals of research methodology including data collection, methodology and report writing.

Definition and type of research materials and methods; Methods of data collection- primary and secondary; Differentiating Questionnaire and Schedule; Techniques of writing dissertation: preparing drafts, abstract and keywords, citations, references, bibliography; Plagiarism: classification and prevention.

Unit -III**Learning Outcome:**

This course also aims to develop fundamental research aptitude among all the students. Besides the course explores the theoretical background to some extent

Fieldwork in Geographical studies: role and significance; Selection of study area and objectives; Pre-field academic preparations. Ethics of fieldwork. Field techniques and tools: Observation (participant, non-participant), questionnaires (open, LOsed, structured, non-structured); Interview; Landscape survey using transects and quadrants, constructing a sketch, photo and video recording; Post-field tabulation, processing and analysis of quantitative and qualitative data; Fieldwork: logistics and handling of emergencies.

Unit IV: Practical**Learning Outcome:**

Above all consists of practical components with programs built on open source. Basic programming is included

1. Identification of research problem
2. Keyword and search query development
3. Searching literature using google scholar and dimension
4. Effective summarizing of literature and writing literature review
5. Problematization/mapping research gap
6. Framing research objective and methodology
7. Development and submission of a research proposal
8. Viva-Voce

Suggested Readings:

CoreI Paper XVII

Natural Hazards and Disaster Management

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I:

Learning Outcome: To understand the nature and scope of Climate Change and Disaster Management.

Understanding Climate Change: Overview of climate change: Definition of climate change and climate variability, climate risks, Disasters, Hazards, Risk, Vulnerability- Definition, Concept and Classification. Global warming, Greenhouse effect, sea level rise, Climate change adaptation strategy.

Unit-II:

Learning Outcome:

To learn the Climate Change and Disaster Adaptation and Mitigation strategy.

Physical, social and economic vulnerability, disaster management- Disaster Management Cycle, Community Based Disaster Management. Role of NDMA and SDMA in Disaster Mitigation Strategy.

Unit-III:**Learning Outcome:**

To learn the extreme climatic events and their effects.

Types of Disasters: Natural and Man made, Floods, Droughts, Cyclones, thunderstorms, tornado, Earthquakes and landslides, lightning, Oil spills, Chemical and Biological attacks.

Unit-IV: Practical:**Learning Outcome:**

To apply the tools and techniques for disaster awareness and mitigation.

Project report/Term paper

1. Disaster management: International- Yokohama Strategy for a Safer World 1994,
2. Hyogo framework for Action 2005-2015; Sendai Framework for Disaster Risk Reduction 2015-2030;
3. Indian Policy for disaster management: Disaster Management Act 2005,
4. 10 point Agenda of Prime minister on DRR.
5. Viva-Voce.

Suggestive readings:**Text Books:**

Core I Paper XVIII Natural Resource Management and Geo informatics (4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I

Learning Outcome:

Understand and appreciate the importance of natural resources and identify different challenges associated with the natural resources

Natural Resource Base (land, water, forest, biodiversity, minerals), classification of resources, Resource depletion and problem of pollution, Resource Curse, historical evolution of NRM Measures: policy and practices; threats to NR and need for management, Valuation methods of Natural resources.

Unit-II:

Learning Outcome:

Analyse the outcome of managing the Natural resources under different resource regimes and evaluate various options available to carry out sustainable resource management.

Management of Resources under different property regimes: (Public, Private, Commons and Open Access). Threats to commons, tragedy of commons, Ostrom's idea on institutional designs; Measures of NRMs: Watershed Management, Forest Management, JFM-Forest Rights Act, CAMPA, Wetland Management, Grassland Management, Ecosystem services of Nature as per MEA (Millennium Ecosystem Assessment).

Unit-III:

Learning Outcome:

Understand the debate between environment and development and evaluate the alternative options available to plan for sustainable development.

Application of Geoinformatics in mapping and monitoring NR: watershed delineation, soil erosion estimation, forest area and health monitoring, forest fire studies, water body monitoring, ground water management, Conjunctive use of tank-groundwater, Adaptive crop planning. Examples from governmental and -governmental practices of NRM.

Unit-IV: Practical

Learning Outcome:

Apply different GIS techniques to measure, analyse challenges of NR degradation and create suitable models for management.

1. Open sources Remote sensing data, watershed management
2. Geo-spatial analysis operation using DEM data, USLE through GIS, NDVI and other indices, change detection, hot spot analysis.
3. Field visit and reporting on Common Property Resource/ Open Access Resource/Ecosystem Services (from a nearby area in Odisha)
4. Viva-Voce

Core I Paper XIX Development

Human Development and Sustainable

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I

Learning Outcome:

Understand the concepts of sustainable development, human health and well-being.

Development: Concept and Indicators, Physical Quality of Life Index (PQLI) and Human Development Index (HDI), Goals of Development-Economic Growth, Distributive Justice, Ecological Sustainability; Sustainable development-Concept and Approaches.

Unit-II

Learning Outcome:

Comprehend the need, importance and features of SDGs.

Goals to Sustainability- UN's 17 SDGs; Localizing sustainable development goals; Population dynamics and Sustainable Development goals, Global health and Sustainable development goals.

Unit-III

Learning Outcome:

Deliberate the basic concepts of epidemiology and public health.

Concepts of Health and Wellbeing; Factors affecting Human Health and Diseases; Concepts of morbidity and its measurements, WHO International Classification of Diseases; communicable and non-communicable diseases; Epidemiological Transition Theory; Evolution of population and health policies in India; Health Inequalities in India with special reference to Odisha-Regional, Social and economic; India's performance in health related SDGs.

Unit-IV: Practical

Learning Outcome:

Can accomplish various practical outlines about the SDGs.

1. Identification and estimation of development indicators
2. Measurement of PQLI
3. Measurement of HDI
4. Tracking SDGs with reference to health indicators.

5. Viva-Voce

Semester-VIII

Geospatial Modelling, Artificial Intelligence and Machine Learning

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Core I Paper XX

Unit-I: Basics of Modeling

Learning Outcome:

Understand the principles of spatial modeling and its applications in geography.

Introduction to spatial modeling concepts, Types of spatial models: deterministic, stochastic, and hybrid; Spatial interpolation techniques: IDW, Kriging, Spline interpolation; Regression

analysis in geography: Linear, Logistic, and Spatial regression; Agent-based modeling and its applications in geography

Unit-II: Machine Learning

Learning Outcome:

Gain knowledge of fundamental concepts and algorithms in machine learning.

Fundamentals of machine learning; Types of machine learning: supervised, unsupervised, and reinforcement learning; Key machine learning algorithms: Random forest (RF), Support vector machines (SVM), decision trees; Unsupervised machine learning: K-means clustering, k-nearest neighbors, Neural networks, Principle Component Analysis; Feature selection methods: filter methods, wrapper methods, embedded methods and Dimensionality reduction techniques: PCA, LDA (Linear Discriminant Analysis), feature hashing; Model evaluation metrics: accuracy, precision, recall, F1-score, AUC-ROC curve; Applications of machine learning in geography: land cover classification, spatial data analysis (Landslide, Flood, Forest fire, species distribution modeling, urban growth prediction etc.).

Unit-III: Basics of Big Data Science and Internet of Things

Learning Outcome:

Explore the concepts and applications of Big data Science and the Internet of Things (IoT) in geography and spatial analysis.

Understanding big data in the context of geography; Introduction to big data technologies: Hadoop, MapReduce, Spark; Geospatial big data analytics: spatial indexing, spatial clustering, spatial data mining; Overview of the Internet of Things (IoT) and its applications in geography; IoT devices and sensors for collecting geospatial data: GPS, remote sensors, drones; IoT architectures and communication protocols: MQTT, CoAP, LoRaWAN; Integration of IoT data with geographic information systems (GIS).

Unit-IV: Practical

Learning Outcome:

To be equipped with the knowledge and skills to tackle complex geographic challenges and leverage emerging technologies for innovative solutions in various domains such as environmental science, urban planning, natural resource management, and disaster risk reduction.

Practical Exercise 1: Implementing IDW, Kriging, and Spline Interpolation

Students will be provided with spatial datasets containing point data (e.g., rainfall, temperature measurements) and tasked with interpolating values across a spatial grid using various

interpolation techniques. They will use GIS software (QGIS) to perform the interpolation and visualize the results.

Practical Exercise 2: Conducting Linear, Logistic, and Spatial Regression

Description: Students will analyze spatial datasets related to a specific geographic phenomenon (e.g., land cover changes over time) and evaluate the model's goodness of fit and statistical significance; Perform regression analysis to identify relationships between predictor variables (e.g., flood risk levels), Interpret the coefficients and odds ratios and the response variable of interest. They will use statistical software (e.g., R or Python) to fit regression models and assess model performance.

Practical Exercise 3: Building an Agent-Based Model

Description: Students will develop a simple agent-based model to simulate the behavior of entities (agents) within a geographic environment. They will define rules and interactions between agents and their environment, run simulations, and analyze model outputs to understand emergent spatial patterns and dynamics. They can use platforms like NetLogo or develop custom simulations using programming languages like Python.

Practical Exercise 4: Implementing Random Forest, Decision Trees, Support Vector Machines (SVM), and Neural Networks

Description: Students will work with geospatial datasets (e.g., satellite imagery, and species occurrence data) and apply supervised and unsupervised machine learning algorithms to classify or predict geographic phenomena (e.g. LULC, flood, Landslide hazard, etc.). Assess the model's performance using metrics such as accuracy, precision, recall, and ROC curve analysis.

Practical Exercise 5: Spatial Indexing and Clustering with Big Data Technologies

Description: Students will work with large-scale geospatial datasets and utilize big data technologies such as Hadoop and Spark to perform spatial indexing and clustering operations. They will implement algorithms like R-tree indexing and k-means clustering to efficiently process and analyze spatial data distributed across multiple nodes.

Practical Exercise 6: Integrating IoT Sensor Data into GIS

Description: Students will collect geospatial data from IoT sensors (e.g., weather stations, and air quality monitors) and integrate it with GIS software for visualization and analysis. They will use protocols like MQTT or APIs provided by IoT platforms to access real-time sensor data and develop workflows to ingest, process, and visualize IoT data within GIS environments.

CoreI Paper XXI

Field Survey: Tools and Technique **(4 Credit, Theory: 45hrs, Practical: 30hrs)**

Unit-I

Learning Outcome:

understand the rationale, principles and classifications of field survey

Field survey: Understand the rationales of field survey in Geography; approaches to field survey; basic principles of field survey; Classification of field survey;

Unit-II:

Learning Outcome:

understand different types of physical survey, their scope and limitations

Physical survey: Plain Table survey: meaning and definition, instruments, steps, methods, advantages & limitations; Dumpy level survey: Definition, components, steps, methods, advantages & limitations; Prismatic Compass survey: Definition, components, steps, methods, advantages & limitations;

Unit-III:

Learning Outcome:

understand the concepts of different types of quantitative and qualitative socio-economic survey

Socio-economic survey : Meaning and concept, Objectives, Sources of data, methods of data collection (quantitative and qualitative), Quantitative survey: basic concepts of sampling, planning a primary socio-economic survey, questionnaire preparation and pretesting of questionnaire, data collection using pen and paper or digital devices, types of possible errors (sampling and non-sampling), data management and quantitative data analysis; Qualitative survey; , key informant interview (KII), Focus Group discussion (FGD), Participatory Rapid Appraisal (PRA), preparation of discussion guideline for KII and FGDs; qualitative quantitative data analysis, content analysis, ethics of primary data collection,

Unit- IV: Practical

LO: acquire skill set to conduct different physical and socio-economic primary survey in geographical research

1. Plain Table Survey/ Dumpy Level survey/ Prismatic Compass Survey
2. For a project report using socio-economic survey data in a selected village, preparation of questionnaire for a quantitative household survey and preparation of guideline for FGDs with a group of women/ men on a social issue and PRA
3. Preparation of project report on socio-economic survey in a village using above quantitative and qualitative data\
4. Viva-Voce

Core I Paper XXII

Political Geography and Globalisation

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I

Learning Outcome:

understand the complex contemporary world power structure and the role of geography in global politics.

Political geography: concept, nature, scope and evolution; Concept of state, nation and nation-state; Attributes of state: frontiers, boundaries, buffer zone, population, territory, sovereignty; Geopolitics: concept, and theories (Heartland and Rimland)

Unit-II

Learning Outcome:

differentiate the State, Nation and Nation State and carry research on strategies compatible to the present technological development

Political geography and systems of government: Federalism, Local self-government administration, Creation of new states; Political geography of resource conflicts: inter-state river water sharing disputes; Conflicts on forest rights and mineral resources; Politics of Displacement: Issues of relief, compensation and rehabilitation with special reference to Dams and Special Economic Zones (SEZs)

Unit-III

Learning Outcome:

establish a clear idea about the relationship of India with its neighbouring countries and also about some international organizations along with their role and importance.

Geo-Economic and Political Blocks: UNO, SAARC and ASEAN, NATO, EU, OPEC and BRICS; India as a global power with special reference to G20; India and its relationship with neighbouring countries: Pakistan, China, Nepal, Bhutan, Bangladesh, Myanmar and Sri Lanka

Unit-IV: Practical**Learning Outcome:**

impart knowledge about political processes operating in society, and how the global and local orders have been reshaped by the power structure and geopolitical factors.

- 1: Prepare a map of the performances of political parties in the last general election in the constituencies of Odisha by using digital cartography by using the data from Election Commission of India.
- 2: Prepare a suitable visualization on State wise percentage share of electors in India by using the data from Election Commission of India.
- 3: Map the types of parliamentary constituencies (SC, ST, GEN) in Odisha by using the data from Election Commission of India.
- 4: Mapping the Indian Ocean region: trade and maritime boundaries.

Core I Paper XXIII

Social and Cultural Geography (4 Credit, Theory: 45hrs, Practical: 30hrs)

Unit-I:

Learning Outcome:

Understand the spatial dimensions of socio-cultural diversities for promoting equality, social justice and wellbeing, harmony.

Definition and Nature of Social Geography; Social Geography in the Realm of Social Sciences; Concept of Social Structure and its importance in Indian Social Realities; Understanding early

Cultural differentiation and Social Formation in India: Spatial distribution of *Sodasa* (Sixteen) *Mahajanapadas*, Mughal Provinces and British Provinces.

Unit-II

Learning Outcome:

enhance the socially aware conscience by knowing the social and cultural components of social groups, regions, and localities for sustainable coexistence

Concepts of Social Justice and Wellbeing; Social Inclusion and Exclusion: Conceptual understandings; Geographies of Gated Communities and Slums; Social Empowerment: Major Schemes of Social Empowerment in India; Affordable Housing Schemes for Low and Moderate-income Resident in India: Concept and Government Initiatives in India (Pradhan Mantri Awas Yojana and Biju Pucca Ghar Yojana).

Unit-III:

Learning Outcome:

Comprehend the cultural dimensions of space and their correlates.

Meaning and definition of Culture and Cultural traits, Types of Culture: Folk and Popular Culture, Cultural Realms of the World, Cultural Hearth; Diffusion of Innovations: Spatial Dimensions; Concept, Types and Conservation of Geo-heritage.

Unit-IV: Practical

Learning Outcome:

Highlight and ponder upon the socio-culturally induced local problems and their solutions.

1. Delineate the prominent residential localities and social morphology of your village or town/city in accordance with the distribution of housing units in terms of caste, tribe, class, religion, and ethnicity.
2. Prepare a sketch map based on field observation.
3. Identify a few Geo-heritage sites and explore the role of culture and local initiatives in its conservation.
4. Produce a brief report with field photographs.
5. Prepare a brief report on how the adoption of popular culture in the wake of cultural globalization is a major cause of environmental pollution and degradation in your localities with evidence and examples.
6. Report and Viva-Voce

Suggested Readings:

CORE COURSE – II / III

Minor (Paper- I)Semester-I / II

PHYSICAL GEOGRAPHY

(4 Credit, Theory: 45hrs, Practical: 30hrs)

**Core I P I
Core III P I**

Unit- I:

Learning Outcome:

Comprehend the fundamentals of geomorphic processes, landforms, climate systems, and hydrology, enabling them to analyze and explain the interconnectedness of these elements within global ecosystems

Meaning, scope, and components of physical geography, Interior of the Earth; Origin of continents and oceans; Isostasy; Earthquakes and volcanoes; Earth movements; Faults, folds; Continental Drift and Plate Tectonic Theories; ; Cycle of erosion: Davis and Penck; Weathering and Mass Wasting.

Unit-II:

Learning Outcome:

Gain comprehensive understanding of the Earth's atmospheric structure, composition, and characteristics, and be able to analyze and interpret climate patterns, factors influencing climate, and the impact of climatic changes on various ecosystems and human societies.

Elements of weather and climate; Structure and composition of atmosphere. Insolation and heat budget, vertical and horizontal distribution of temperature; Atmospheric pressure and winds- Air mass, Frontogenesis, Tropical CyLOne and Origin; and mechanism of Monsoon.

Unit-III:

Learning Outcome:

Acquaint themselves with thorough understanding of the hydrological cycle, the movement and distribution of water across terrestrial and marine systems, allowing them to ocean bottom topography, ocean temperature and salinity, ocean currents, and sediment deposits.

Hydrological Cycle: Factors affecting run-off, infiltration and groundwater. Water Storage and Circulation; Ocean bottom topography; Temperature and salinity of ocean water; Ocean current and deposits.

Unit-IV: (Practical)

Learning Outcome:

Honed their fieldwork and laboratory skills, enabling them to apply physical geographic methods to collect, analyze, and interpret data from real-world environments.

proficient in representing relief features such as Mountains, Valleys (U shaped and V shape), Waterfalls, Plateaus, and

1. Drawing of Contour Features – Mountain, Valley (U shaped and V shape), Waterfall, Plateau and Escarpment;
2. Calculation of time of place with reference to GMT;
3. Introduction to use of simple weather observation instruments: Thermometer (Wet and dry bulb temperature), Barometer, hygrometer, anemometer, wind vane, Rain Gauge, Stevenson Screen,
4. Interpretation of weather maps; Construction and interpretation hydrographs and unit hydrographs; T-S Diagram.
5. Practical Record and Viva.

Suggested Readings:

Minor (Paper- II)

Semester-III / IV

HUMAN GEOGRAPHY

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Core II P II

Core III P II

Unit-I:

Learning Outcome:

Analyse the complex relationships between humans and their physical and social environments. Identify and analyze the key concepts of human geography and its evolution.

Meaning, Nature and Scope of Human Geography; Its Contemporary Relevance; Major Themes and concepts of Human Geography (Location, Place, Region and Movement, Accessibility, Agglomeration, Mental Map, Space, Space-time continuum, Landscape, Regionalism, Topophilia and topophobia, Diffusion, and Distribution) Man-nature inter-relationship (Determinism, Possibilism and Neo-determinism), Development of human geography- contributions of Germans, French and Americans.

Unit - II:

Learning Outcome:

Understand patterns and processes of population growth and its implications. Demonstrate cultural awareness and sensitivity in understanding diverse race, religion, linguistic, ethnicity and cultural practices and beliefs that shape human geography and their implications for society.

World Distribution of racial, religious, linguistic and ethnic groups; Evolution of Culture and Cultural realms of the world; World Population Growth, Population Problems. Global cultural diversities- diffusion of culture.

Unit-III:

Learning Outcome:

Understand types and patterns of human settlement and its dynamism. understand different forms of inequalities.

Types and Patterns of Rural Settlements; Concept and Classification of Urban Settlements; World Urbanization with special reference to developing countries, Salient Features of cultural globalization. Regional diversity and disparity (Gender, Ethnicity and Income).

Unit-IV: Practical

Learning Outcome:

Design and implement research projects related to human geography, including the collection, analysis, and interpretation of data related to socio-cultural and economic status of local/regional ethnic communities. Communicate complex ideas related to human geography to a range of audiences, both orally and in writing.

Project Report and Presentation on

1. Socio-cultural and economic status of any ethnic group in India.
Or
2. Evolution of the settlement where you live/local settlement.

Suggested Readings:

Text Books:

- ✓ Hussain, Majid (2012) *Human Geography*, Rawat Publications, Jaipur.
- ✓ Harm d. Blij. (1992). *Human and Economic Geography*, Mac Millan, New York.
- ✓ Singh, L.R. (2005). *Fundamentals of Human Geography*. Sharda Pustak Bhawan, Allahabad.

Reference Books:

- ✓ Rubenstein, James M. (2022) *Contemporary Human Geography*, Pearson, U.S.A

Minor (Paper- III)

Semester- V / VI

Population Geography

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Core II P III

Core III P III

Unit- I:

Learning Outcome:

Explain meaning, scope and development of population geography as a distinct branch of Geography

Defining the Field, Nature and Scope of population geography; Sources of population data with special reference to India (Census, National Family Health Survey and NSS); Demographic Balancing Equation; Population Distribution and Growth – Measures, Factors, and World Patterns; Concept of Doubling Time, Concepts of Rate, Ratio and Proportion.

Unit- II:

Learning Outcome:

Understand key concepts, different components of population along with its drivers

Population Dynamics: Fertility, Mortality and Migration - Measures, Determinants and Implications; Theories of Population Growth – Malthusian Theory, Optimum Population Theory and Demographic Transition Theory; Population Resource Regions.

Unit-III:

Learning Outcome:

Examine population dynamics and resultant socioeconomic issues and problems.

Population Composition and Characteristics – Age-Sex, Rural-Urban, Literacy, Occupational Structure; Contemporary Population Issues – Population Ageing, Declining Child Sex Ratio, HIV/AIDS; Population problems and policies in Developed and Developing countries with Special reference to India.

Unit-IV: Practical

Learning Outcome:

compare and relate population growth and distribution of developed and developing countries

1. Estimation of Population Growth
2. Arithmetic and Geometric Projection calculation and graphical display
3. Population distribution maps using symbols – Simple and Multiple Dots, Circles and Spheres
4. Construction of Lorenz Curve
5. Construction of Population Pyramid
6. Practical Record and Viva-Voce

Suggested Readings:

Reference Books:

- ✓ Chandna, R. C. (2015). *An Introduction to Population Geography*, Kalyani Publishers.
- ✓ Clarke, J. I. (1965). *Population Geography*, Pergamon Press, Oxford.

Suggested Readings:

- ✓ Barrett, H. R. (1995). *Population Geography*, Oliver and Boyd.
- ✓ Bhende, A. and Kanitkar T. (2000). *Principles of Population Studies*, Himalaya Publishing House.
- ✓ Hassan, M.I (2020). *Population Geography: A Systematic Exposition*, Routledge, London and New York.
- ✓ Jones, H. R. (2000). *Population Geography*, 3rd ed. Paul Chapman, London.
- ✓ Newbold, K. B. (2009). *Population Geography: Tools and Issues*, Rowman and Littlefield Publishers.
- ✓ Pathak, K.B and F. Ram (2016). *Techniques of Demographic Analysis*, Himalaya Publishing House, Mumbai.
- ✓ Maurya, S. D. (2017). *Population Geography*, Sharda Putak Bhawan, Allahabad.
- ✓ Srinivasan, K (1998). *Basic Demographic Techniques and Applications*, Sage Publications, New Delhi.

Semester- VII/VIII (With/Without Research)

Core II Paper IV

Geography of India

Unit-I:

Learning Outcome:

Understand the locations, physiography, climatic conditions, and distribution of soils in India.

Physiography divisions of India, Himalayan and Peninsular rivers, watershed and interlinking rivers, India's Climatic classification by Koeppen and Trewartha, Mechanism of Indian monsoon, Soils: distribution and characteristics of major soil groups.

Unit-II

Learning Outcome:

Acquaint themselves with thorough understanding of the Indian Agriculture and regional disparities in agricultural development.

Agricultural regionalization-Agro climatic zones, regional disparities in agricultural development, Govt. Schemes related to Agriculture; Green revolution, white, blue revolution and its socio economic cum ecological implications. Joint Forest Management, Social forestry, Conventional and non-conventional sources of energy, Energy Crisis and Conservation, Biosphere reserves and National Parks.

Unit-III

Learning Outcome:

Familiar with the Industries, industrial policy and transport networks of India.

Industries: Types and classifications, Factors of location and development of jute, Tea, Paper, Fertilizer and IT industries, Industrial policies in India, SEZs, Transport system of India: Roadways, Railways, Ports, Inland waterways, Airways and Pipeline network, Growing importance of ports in national and foreign trade.

Unit-IV

Learning Outcome:

Understand the regional development and planning and political Aspects of India.

Experience of regional planning in India: Five year plans; integrated rural development programmes; Panchayati Raj and decentralized planning; Command area development; Watershed management; planning backward area, desert, drought-prone, hill tribal area development, Multi-level planning, Geographical basis of Indian federalism, State reorganization, Emergence of new states, Regional consciousness and inter-state issues, International boundary of India and related issues.

Suggested readings:

Text Books:

Semester- VII/VIII (With/Without Research)

Core II Paper V

Geography of Odisha

Unit-I:

Learning Outcome:

Understand the locations, physiography, climatic conditions, and distribution of soils in Odisha.

Geological Structure: Distribution of Major Rock Systems; Physiographic Divisions; Factors Influencing Climate of Odisha; Climatic Regions; Major Soil Types; Natural Vegetation.

Unit-II

Learning Outcome:

Acquaint themselves with thorough understanding of the demographic structure

Growth, Distribution and Density of Population; Population Composition: Linguistic, Rural-Urban; Distribution of Cities and Towns; Regional Variation in Folk Housing Types in Rural Odisha; Processes and Dynamics of Migration in Odisha.

Unit-III

Learning Outcome:

Familiar with the socio-cultural activity in Odisha.

Geographical Factors Behind Odisha's History and Culture; Evolution of Odia Language and Regional Variations; Diversity of Tribes and Social Formation; Regional Variation of Food Preferences and Habits; Folk and Popular Odia Cultures; Identifying Vernacular Cultural Regions of Odisha.

Unit-IV**Learning Outcome:**

Understand economy and Natural Disaster of Odisha.

Major Farming Types; Industrial Belts of Odisha; Cottage and Handicraft Industries of Odisha; Fisheries: Fresh and Marine; Aspirational districts and other major welfare schemes, Natural Disaster and Odisha (Cyclone, Flood): Risk and Vulnerability; Paradigm Shifts in Disaster Management: Success Stories of Odisha.

Suggested readings:**Text Books:**

MULTIDISCIPLINARY COURSES UNDER NEP-2020

SEM- I: SUSTAINABLE ECO-TOURISM

(3 Credit, Theory: 30hrs + Practical: 30hrs)

(For Students of other disciplines/subjects)

Program Outcomes

- Student will gain the knowledge on concepts of eco-tourism and its functional role towards environmental balance.
- Student will be able to acquire the knowledge on various eco-tourism projects on bio reserves, national parks of Odisha and the Country, eco-tourism regulation and laws.

Course Outcomes

- Students will be able to understand the principles, functions and type of eco-tourism, eco-tourism activities and its impact on nature and environment.
- The learners will gain the knowledge on sustainable eco-tourism and its socio-economic relevance, facilities, planning and management.
- Students will be able to understand the role of national and international laws and regulations for sustainable eco-tourism.

Learning Outcomes

- The learning outcome of the course involves strengthening the students in understanding the need of eco-tourism, and its impact on environment.
- Understand sustainable eco-tourism and resource management.
- The learners will be able to understand the responsibilities, issues and challenges of conservation of protected area for eco-tourism projects along with community participation.
- The students will be able to apply the knowledge of primary role of national and international agencies towards implementation and execution for sustainable eco-tourism management.

Unit-1: Ecotourism

Evolution, Principles, Trends and Functions of Ecotourism, Mass Tourism vs Eco tourism, Typology of Eco-tourists, Ecotourism Activities & Impacts, Western Views of Ecotourism, Quebec Declaration, Kyoto Protocol, Oslo Declaration, Ecological Foot Prints. Relationship between Tourism & Ecology.

Unit-2: Alternative & Responsible Tourism

Ecotourism development - Sustainable Ecotourism. Resource Management, Socio-economic Development. Ecotourism Policies, Planning and Implementation. Eco-friendly Facilities and Amenities. Carrying Capacity, Alternative Tourism & Responsible ecotourism- Ecotourism Programming.

Unit 3: Eco Tourism Trends, Issues and Challenges:

Conservation of Ecotourism Protected Area Management through Ecotourism - Community Participation - Types of Participation, Issues and Challenges - Ecotourism Projects - Case Studies on Periyar National Park, Thenmala Eco-Project, Similipal Ecotourism Project, Sunderbans Eco tourism Project, Kaziranga National Park, Nandadevi Biosphere Reserve, Corbett National Park, Gulf of Manar, Kruger National Park, South Africa.

Unit 4: Role of National and International Agencies

Ecotourism Development Agencies- Role of the International Ecotourism Society – the UNWTO, UNDP, WWF - Department of Forest and Environment - Government of India, ATREE, EQUATIONS.

Suggested Readings

- ✓ Weaver, D. (2001). The Encyclopedia Of Ecotourism, Cabi Publication.
- ✓ Fenel, D. A. and Dowling, R. K.(2003). Ecotourism Policy and Planning, CabiPublishing, USA
- ✓ Sukanta K Chaudhury. (2006). Cultural, Ecology and Sustainable Development, Mital, New Delhi.
- ✓ Ralf Buckley (2004), Environment Impacts of Ecotourism, Cabi, London.
- ✓ Ramesh Chawla (2008), Ecology and Tourism Development, Sumit International, NewDelhi.

MULTIDISCIPLINARY COURSES UNDER NEP-2020

SEM- II: Climatology

(3 Credit, Theory: 30hrs + Practical: 30hrs)

(For Students of other disciplines/subjects)

Course Objective:

- To introduce Climate, climate change and its implications.
- To explain climate system and heat budget of earth
- To introduce the mechanism and effects of Monsoon
- To provide an understanding of Atmosphere and Hydrosphere and their circulation patterns

Learning Outcome:

- Describe a systematic observation on Climate and implications of climate change.

- Explain the significance of climate and climate change
- Elaborate the heat budget and the mechanism of monsoon
- Evaluate the various circulation patterns of Atmosphere and Hydrosphere and its impact on climate

Unit - I: Climate system and classification and Climate change

Components of the climate system, Climate controlling factors, Climate system response, response rates and interactions within the climate system. Basis of classification; Koppen's classification; Thornthwaite's classification; Brief idea on Types of Climate found in India. Climate forcing and feedbacks,.

Unit - II: Heat budget of Earth and Interactions

Incoming solar radiation, receipt and storage of heat; Heat transformation; Earth's heat budget.

Interactions amongst various sources of earth's heat; Monsoon, its mechanism and its intensity influencing factors; Effects of monsoon.

Unit - III: Atmosphere & Hydrosphere

Stratification of atmosphere and atmospheric circulation; Atmosphere-ocean interaction and its effect on climate; Heat transfer in ocean; Global oceanic conveyor belt and its control on earth's climate; Surface and deep circulation.

Practical

1. Study of distribution of major climatic regimes of India on map.
2. Distribution of major wind patterns on World map.
3. Ocean currents and heat circulation

Text Book:

- ☐ Rudiman, W.F., 2001. Earth's climate: past and future. Edition 2, Freeman Publisher.

Suggested Readings:

- ☐ Rohli, R.V. and Vega, A.J., 2007. Climatology. Jones and Barlett.
- ☐ Lutgens, F., Tarbuck, E., and Tasa, D., 2009. The Atmosphere: An Introduction to Meteorology. Pearson Publisher.

- Aguado, E., and Burt, J., 2009. Understanding weather.

MULTIDISCIPLINARY COURSES UNDER NEP-2020

SEM- III: Oceanography

(3 Credit, Theory: 30hrs + Practical: 30hrs)

(For Students of other disciplines/subjects)

Course Objective

- To introduce the oceans, its bathymetric divisions and features.
- To learn about waves and currents
- To learn about the properties of seawater
- To learn about ocean current and its impact on environment

Learning Outcome:

- Describe the ocean floor topographic features.
- Understand the origin of waves, tides and current.
- Describe the properties of seawater and their interaction with energy.
- Understand the various ocean currents and water mass circulation and their drivers.

Unit - I: Introduction to Oceanography

Ocean Floor Topography – Continental Shelf, Continental Slope, Continental Margin, Continental Rise, Submarine Canyons, Mid Oceanic Ridges, Trenches, Abyssal Plains.

Wave theories, Tides- type of tides, tidal currents, rip currents.

Unit - II: Properties of Seawater

Salinity and chlorinity; temperature; thermal properties of sea water; density and stability, conductivity, viscosity, heat budget, colligative and other properties of sea water.

Unit - III: Ocean Currents and Circulation

Definition, direct and indirect forces acting on sea water, surface currents, Coriolis effect, geostrophic currents, upwelling, sinking, circulation, El-Nino, La-Nina, significance of major ocean currents of the world, measurement of currents. Thermo-haline circulation.

Suggested practical:

- Observed the oceanographic divisions using Google Earth. Creating bathymetric profiles
- GEBCO Undersea features and landforms
- Major currents and Ocean circulation patterns of world oceans.

Textbook:

- Trujilo, A. and Thurman, H. (2012) Essentials of Oceanography, 12th Edition, Pearson

Suggested readings:

- Gross, M. G. (1977). Oceanography: A view of the earth.
- Invitation to Oceanography (2009) Paul R. Pinet Jones & Barlett Learning

SKILL ENHANCEMENT COURSES (SEC) UNDER NEP-2020

SEM-II: YOGA IN EVERYDAY LIFE

(3 Credit, Contact Hours: 45hrs)

Introduction:

This course on "Yoga in Everyday Life" would aim to integrate the principles and practices of yoga into students' daily lives, promoting physical, mental, and emotional well-being. Students will have a holistic understanding of yoga and its practical applications for everyday life. They would be equipped with the knowledge and skills needed to cultivate health, happiness, and inner peace through the practice of yoga.

Course Outcomes:

1. Understanding of the importance of yoga for a balanced life.
2. Understanding of the physical, mental, and spiritual dimensions of yoga.
3. Realization of the instrumentality of yoga for a spiritual transformation.

Learning Outcome:

Unit I: In a simple sense, Yoga is practical instead of theoretical speculation. By practicing yoga, one should keep his body healthy & restrain himself from all kinds of desires. the yogic practices only can lead the yogin from a lower stage to a higher & also help him to become a Sadhaka.

Unit II: Yoga philosophy gives the eight-fold path of discipline to control the body, senses & mind. After practicing it, one should achieve perfection & highest means

to realize the kaivalya.

Unit III: Karma, jnana & Bhakti are the three important aspects of Bhagvad Gītā. the practice of the three yogas is a continuously evolving journey that takes us to what is considered to be the highest practice of yoga in Bhagvad Gītā.

Unit IV: In Buddhism, the four Brahma vihara are powerful aids for resolving conflict, evoking loving-kindness & goodwill & creating social harmony. & Also, Astangika marga releases a person from the cycle of rebirth. It is the way to end suffering.

Unit I: Introduction to Yoga Philosophy; the Divine, World, Man and his Destiny according to Patanjali's Yoga; Meaning and Types of Yoga; Spiritual instructions and disciplines for Yoga; Yoga for Health and Realization, Yogic Life, Courses of Sādhana.

Unit II: Yama and Niyamas, Āsana, Prāṇāyāma, Pratyāhāra, Dhāraṇā, Dhyāna, and Samādhi in the context of Patañjali Yoga;

Unit III: Karma, Jñāna, Raja, Bhakti Yoga, Triguna and Trigunātīta Yoga in the context of the Bhagavad Gītā; Integral Yoga of Sri Aurobindo.

Unit IV: Aṣṭāṅga Mārga, and Vipāśyanā, Six Pāramitās, Four Brahma Vihāras of the Buddhism...

SKILL ENHANCEMENT COURSES (SEC) UNDER NEP-2020

SEM-II: PERSONALITY DEVELOPEMENT

(3 Credit, Contact Hours: 45hrs)

Learning Outcome

1. Comprehending the scope of personality and its development.
2. Enabling development of core skills for development of self.
3. Understanding positive personality traits
4. Cultivating skills for successful life

Unit-I: Personality Development

- Personality-Concept, nature, traits of Personality, Social etiquettes and manners
- Determinants of personality- physical, intellectual, emotional, linguistic and cultural
- Importance of personality development, Factors influencing Personality Development
- Self-confidence – Meaning and building techniques, Willpower- Increasing the Willpower for self-improvement.

Unit-II: Attitude and Motivation

- Attitude – Concept and types
- Developing a positive attitude in life and factors affecting attitudes
- Motivation– Concept, significance and type
- Importance of self-motivation and factors leading to de-motivation

Unit-III: Career planning activities

- Time management skills
- Resume building, Art of Facing Interviews
- Significance of personality Test & Aptitude tests
- Mock Interview Sessions

Suggested readings:

- 1) Andrews, Sudhir (1988). How to Succeed at Interviews. 21st (rep.) New Delhi, TataMcGraw-Hill.
- 2) Barun K. Mitra, Personality Development and Group Discussions, Oxford University PressCareer Digest

SKILL ENHANCEMENT COURSES (SEC) UNDER NEP-2020

SEM-VI: DIGITAL CARTOGRAPHY

(3 Credit, Contact Hours: 45hrs)

Course Objectives

- To know the basics, importance, and methods of Cartography
- To study the various maps projection and co-ordinate systems.
- To study the different aspects of design in cartography.
- To learn the Generalization and designing aspects of cartography
- To learn the different techniques of Map production and Reproduction

Learning Outcome:

- Able to define and justify the purpose of each cartographic element
- Use digital tools for generating cartographic products
- Evaluate digital maps for their thematic appropriateness
- Generate maps with a scale and requisite projection

Unit I: Introduction

History and evolution of Cartography. Definition, scope and concepts of cartography. Characteristics of Map. Categories of maps. Methods of mapping, relief maps, thematic maps. Trends in Cartography.

Unit II: Cartographic (Map) Elements:

Geoid & Spheroid, Map projection & Transformation, Map Scale and Coordinate system. Plane co-ordinates in UTM system, projection used in Survey of India topographic sheets.

Unit III: Cartographic Representation & Visualization:

Digital Data types, Data sources (Survey and positioning, Remote sensing, Census and sampling), Data Visualization of different data types, Labels and Symbols, Visualizing discrete and continuous data. Map design and generation.

Practical:

- Analyzing Toposheets and Geological Maps
- Digital cartographic Data Sources (vector and Raster data)
- Projection and Transformation
- Map design and cartographic output

Textbook:

- ✓ *Cromley .R.G, “Digital Cartography”, Prentice-Hall of India, New Delhi, 1992.*

Suggested Readings:

- ✓ *Robinson .A. H, Morrison .J. L, Muehrcke .A. C, Kimerling .A. J and Guptill .S. C, “Elements of Cartography”, 6th Edition, John Wiley and Sons, 1995.*

- ✓ *Anson .R.W and Ormeling .F.J, “Basic Cartography for students and Technicians”, Vol., I, II and III Elsevier Applied Science publishers 2nd Edition, 1995.*

VALUE AIDED COURSES (VAC) UNDER NEP – 2020

SEM I - ENVIRONMENTAL STUDIES & DISASTER MANAGEMENT

(3 Credit, Theory: 45hrs)

Unit 1: Multidisciplinary nature of environmental studies (12 Period)

Definition, scope and importance

Need for public awareness

Environmental Pollution

Definition, Cause, effects and control measures of: -

- a) Air pollution
- b) Water pollution
- c) Soil pollution
- d) Marine pollution
- e) Noise pollution
- f) Radiation pollution

Unit 2: Natural Resources: (12 Period)

Renewable and non-renewable resources:

Natural resources and associated problems.

- a) Forest resources: Use and over-exploitation, deforestation, case studies.
Timber extraction, mining, dams and their effects on forest and tribal people.
- b) Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems.
- c) Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies.
- d) Food resources: World food problems, changes caused by agriculture and Overgrazing, effects of modern agriculture, fertilizer-pesticide problems, waterlogging, salinity, case studies.
- e) Energy resources: Growing energy needs, renewable and non-renewable energy sources, use of alternate energy sources. Case studies.

Biodiversity: -

Introduction-Definition; Biogeographically classification of India

India as a mega diversity nation. Hot spots of biodiversity, Threats to biodiversity. Endangered and endemic species of India. Conservation of biodiversity. In Situ and Ex-situ conservation of biodiversity

Unit-3: Disaster Management

(12 Period)

1. **Disaster Management:** Types of disasters (natural and Man-made) and their causes and effect)
2. **Vulnerability Assessment and Risk analysis:** Vulnerability to various disasters (Flood, Cyclone, Earthquake, Heat waves, Desertification and Lightning)
3. **Institutional Framework:** Institutional arrangements for disaster management (National Disaster Management Authority (NDMA), State Disaster Management Authority (SDMA), Disaster Management Act, 2005, District Disaster Management Authority (DDMA), National Disaster Response Force(NDRF) and Odisha Disaster Rapid Action Force(ODRAF)
4. **Preparedness measures:** Disaster Management cycle, Early Warning System, Pre-Disaster and Post-Disaster Preparedness, strengthening of SDMA and DDMA, Community Preparedness for flood cyclone, heat waves, fire safety, lightening and snake biting. Stakeholders participation, Corporate Social Responsibility (CSR)
5. **Survival Skills:** Survival skills adopted during and after disaster (Flood, Fire, Earthquake, Cyclone and Lightning), Disaster Management Act-2005, Compensation and Insurance

Unit 4: Social Issues and the Environment

(9 Period)

A.

- a) Environmental Ethics: Issues and possible solutions.
- b) Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust. Case studies
- c) Environment Protection Act
- d) Air (Preservation Control of Pollution) Act
- e) Water (Preservation Control of Pollution) Act
- f) Wildlife Protection Act
- g) Forest Conservation Act
- h) Solid waste management Cause, effect and Control Measure of Urban and Industrial waste (Role of each individual in conservation of Natural resources and prevention of pollution)

B. Human Population and the Environment

Population Ecology: Individuals, species, population, community
Human population growth, population control method
Urbanisation and its effect on society

Unit 5: Field work**(15 Periods of 30 hrs)**

- Visit to an area to document environmental assets: river/forest/flora/fauna, etc.
- Visit to a local polluted site- Urban/Rural/Industrial/Agricultural
- Study of common plants, insects, birds and basic principles of identification.
- Study of simple ecosystems-pond, river, Delhi Ridge ,etc.

Value Aided course**SEM III- UNDERSTANDING ODISHA****(3 Credit, Theory: 45hrs)****COURSE OUTCOME**

- To familiarize the students with Odisha, its history, linguistic heritage, religion, culture, literature, geographic features, tribes and their culture, dance and music and contemporary features.
- To enable the students to develop an informed perspective about their land, people, their past and present and the challenge they face.
- To enable the students to face competitive examinations for jobs under Govt. of Odisha

COURSE CONTENTS**Unit- I ODISHA'S PHYSICAL AND HUMAN GEOGRAPHY****[9 hours]**

✓ *Learning Outcome: Familiar with the physiography, drainage, climate and forests in Odisha*

- Physiography, Drainage systems, Climate, natural vegetation
- Major Industries and Minerals in Odisha : Iron Ore, Coal, Bauxite and Chromite
- Steel and Aluminum industries
- Growth and distribution of population

Unit- II AN OUTLINE OF POLITICAL HISTORY OF ODISHA**[9 hours]**

✓ *Learning Outcome : To enable the students to familiarize themselves with the chronology of Political History , formation of Odisha in modern days and freedom movement*

- Ashoka and Kharavela
- An outline of Dynastic History of Odisha: Bhaumkaras, Somavamsies, Gangas and Gagapatis
- Odisha under Mughals and Marathas
- Movement for Separate Province of Odisha and freedom struggles Odisha

UNIT- III AN INTRODUCTION TO ODISHA'S CULTURE AND HERITAGE**[9 hours]**

✓ **Learning Outcome :** *Understand Essence of Odisha's Culture, Art, Architecture, Dance , Music, Religion, and Literature*

- Temple Architecture in Odisha
- History of Odia Literature from ancient period to independence including Bhakti Literature, Development of Odia Script
- Dance and Music : Odissi, Gotipua, Chhau, and Folk
- Religion in Odisha: Shaivism, Vaishnavism and Neo-Vaishnavism(Chaitanya),Shakti cult, Jagannath Culture, Islam and Christianity in Odisha
- Odisha Cuisine
- Major Festival of Odisha

UNIT- IV TRIBES OF ODISHA

[9 hours]

✓ **Learning Outcome:** *Odisha has a large concentration of Tribal Population; students would develop an understanding of their culture, and develop an appreciation at their ways of life.*

- Essentials of 62 Tribes of Odisha : Major Tribes and PVTs, festivals, beliefs, art and craft

UNIT- V CONTEMPORARY ODISHA

[9 hours]

✓ **Learning Outcome:** *To be cognizant of contemporary Odisha*

- Districts of Odisha – An Outline
- Education – Primary, Secondary, Higher education including Technical.
- Tourism in Odisha including Eco-tourism
- Industry, Agriculture, Public Health, Service Sector (including IT)

Text Books

- Odisha Reference Year book (Latest Edition) by B.K. Publication Pvt. Ltd

Reference

- History of Odisha by Prof. Atul Chandra Pradhan
- History of Odia Literature by Mayadhar Mansingh

Odisha Review and Utkal Prasanga (Current Issues)

Value Aided Course

SEM V - UNDERSTANDING INDIA

(3 Credit, Theory: 45hrs)

COURSE OUTCOME

- To familiarize the students with the history, culture, geography, polity and economy of India

- To enable them to gain basic understanding of India to prepare for various competitive examinations both at national and state level.
- UGC under NEP 2020 has suggested a course on understanding India under Value Added Course

COURSE CONTENTS

UNIT-I GEOGRAPHY OF INDIA

[11 hours]

✓ **Learning Outcome:** *To familiarize the learner with geographic features of India.*

- Physiographic divisions of India, Drainage, Climate of India
- Characteristics of Indian Agriculture,
- Major Crops: production and distribution of rice and wheat, cotton, sugarcane
- Major Industries and minerals: iron ore, coal, petroleum, natural gas
- Demographic structure: Distribution and growth, census in India

UNIT- II UNITY IN DIVERSITY

[12 hours]

✓ **Learning Outcome:** *To enable the students to understand how India is plural and multidiversified society. To make the students aware how diversity has been a source of strength for nationalism in India both Pre and Post-Independence period.*

- Ethnic, linguistic, geographic, religious and cultural diversity and unity of India.
- The Idea of India: Jambudipa Bharat Varsha, Uttar Patha, Dakhina Patha, Hindustan and India and 'Bharat'
- Evolution of Syncretic Indian culture during 1000 CE to 1800 CE : Religion (Suffi/Bhakti) Art and Architecture, Music and literature
- Socio- economic, Political and Cultural impact of British Rule: An outline of India's freedom struggle(1857-1947)

UNIT- III INDIAN POLITY AND ITS POLITICAL IDENTITY

[11 hours]

✓ **Learning Outcome -** *To know about the Indian polity and its distinctive features*

- Salient features of Indian constitution (Republic, Federal, Parliamentary, Democracy, Secular, Separation of power, Centre-State Relationship, Panchayat- Raj
- Fundamentals Rights and duties, Directive Principles of State Policy and Affirmative Action
- India's Foreign Policy, International Trade Policy and Global Standing

UNIT- IV INDIAN ECONOMY

[11 hours]

Learning Outcome:

- ✓ *To familiarize students of hurdles to development*
- ✓ *To analyze the mechanism of economic transformation in India*

- Concept of development: Core Values of development, Sustainable development and Social development
- Poverty: Poverty line, concepts of absolute and relative poverty, MDPI and Poverty alleviation-measures
- Social Sector Initiatives: Quality education, human capital development, health care, rural development

- Economic growth since independence in Agricultural, Industrial and Service Sectors and Sectorial contribution to GDP in India
- Regional Imbalance: An analytical approach (Convergence/Divergence approach)
- Fiscal Federalism: System of Devolution of Funds
- Economic challenges of 21st century

Text Books

1. Unity in Diversity, R.K. Mookorjee
2. Freedom struggle of India, Barun De, Bipan Chandra and Amle Tripathy, NBT, Govt. of India
3. An Advanced History of India, Roychoudhury Dutt and Majumdar
4. Indian Economy, Mishra and Puri, Himalaya Publication
5. India Year Book, Govt. of India, Publication Division
6. Indian Economy- *Dutta and Sundaam*
7. An Introduction to Constitution of India- *D.D. Basu*
8. Indian Economy by Uma Kapila
9. Indian Polity, M. Laxmikanth, Tata Mc graw Hill

Sample Question

1. Who used the term “Bharat Varsha” in an inscription for the first time in India’s history? [1 mark]
2. State the course of R. Ganga by identifying at least 4 states of India through which it passes. [2 marks]
3. Enumerate explain the major challenges faced in the 21st century by India [5 marks]
4. Write a critical essay on Center State Relationship in India.[8 marks]

N: B

- ✓ *A single text book covering all aspects is not readily available. It shall be developed by OSHEC/DDCE Utkal University/OSOU/ OTBP & P and similar other organization.*
- ✓ *VTP lectures shall be prepared.*

Value Aided Course

SEM VI - ETHICS & VALUES

(3 Credit, Theory: 45hrs)

COURSE OUTCOME

- Development of a good human being and a responsible citizen
- Developing a sense of right and wrong leading to ethically correct behavior
- Inculcating a positive attitude and healthy work culture
- To equip the students to prepare themselves national and state level civil service and other competitive examination.

COURSE CONTENTS

UNIT-I- ETHICS AND HUMAN INTERFACE

[5 Hours]

Learning Outcome-

- ✓ *Understand the basic concept of ethics and its relevance in life*
- Ethics and Human Interface: Essence, Determinants and consequence of ethics and human action.
- Dimensions of Ethics in private and public relationship
- Human Values: Tolerance, Compassion, Rationality, Objectivity, Scientific Attitude Integrity, Respecting conscience and Empathy etc.
- Mahatma Gandhi and Ethical Practices: Non-Violence, Truth, Non-hatred and love for all, concern for the poorest, objective Nationalism and Education for man making. Relation between Ends and Means.

Subject Teacher: Philosophy/Political Science or Any other Teacher.

UNIT-II- ETHICS AND MAJOR RELIGIONS AND CIVILIZATIONS

[7 hours]

Learning Outcome-

- ✓ *Be familiar with ethical principles and values promoted by major religious traditions and civilization*
- Hinduism- Dharma and Mokhya (out of 4 goals of life Dharma, Artha, Kama and Mokhya), Concept of Purusartha, Nisakama Karma(work without attachment to results), Concept of Basudev Kutumba and Peace (Whole world including all animals, plants, inanimate beings and human form one world)
- Ten Commandments: (Christianity and Judaism Tradition)
- Islamic Ethics: Justice, Goodness, Kindness, Forgiveness, Honesty, Purity and Piety
- Egyptian- Justice, Honesty, Fairness, Mercy, Kindness and Generosity
- Mesopotian-Non-indulgence in lying, stealing, defrauding, maliciousness, adultery, coveting possession of others, unworthy ambition, misdemeanors and injurious teaching.
- Buddhism-Arya Astangika Marg: Right View, Thought, Speed, Action, Livelihood, Efforts, Attention and Concentration.
- Jainism-Right faith, knowledge and conduct(Triratna)
- Chinese-Confucianism- Respect for Autonomy, Beneficence, non-maleficence and justice. Taoism: No killing, No stealing, No sexual misconduct, No false Speech and No taking of intoxicants.

Subject Teacher: History/Philosophy/Political Science or Any other Teacher.

UNIT-III- CONSTITUTIONAL VALUES, GOOD CITIZENSHIP, PATRIOTISM AND VOLUNTEERISM

[10 Hours]

Learning Outcome-

- ✓ *Students Learn about constitutional values of India, Civic Sense and good Citizenship (both National and International) Patriotism and need for Volunteerism*
- Salient Values of Indian Constitution: Sovereign, Socialist, Secular, Democratic, Republic, Justice, Liberty, Equality and Fraternity

- Patriotic values and ingredients of National Building, Examples of great Patriots, Rani Laxmi Bai, Bhagat Singh, Mangal Pandey, Birsa Munda, Laxman Naik, Subhas Chandra Bose and Khudiram Bose.
- Law abiding citizenship
- Concept of Global citizenship in contemporary world
- Volunteerism- concept and facts of Volunteerism, building a better society through Volunteerism, Blood Donation, Social work, Helping the Aged, Promotion of Green Practices and Environment protection.

Subject Teacher: Philosophy/Political Science /History/ or Any other Teacher.

UNIT-IV- WORK ETHICS

[6 hours]

Learning Outcome-

- ✓ *Understand the concept of work ethics, ethics in work place and ethical practices to be adopted by various professionals*
- The concept of professionalism.
- Professional ethics at work place
- Core values needed for all professionals. Reliability, Dedication, Discipline, Productivity, Co-operation , Integrity, Responsibility, Efficiency, Professionalism, Honesty, Purity and Time Management, Accountability, Respect Diversity, Gender Sensitivity, Respect for others, Cleanliness, Rational Thinking, Scientific Attitude, Clarity in Thinking . Diligence, cleanliness and Environment Consciousness.
- Codes of conduct for Students(both in College and Hostels), Teachers, Business professional, Doctors, Lawyers, Scientist, Accountants, IT professionals and Journalist.
- Practical ethics in day to day life.

Subject Teacher: Commerce/Philosophy/Education/History/ or Any other Teacher.

UNIT-V-ETHICS AND SCIENCE AND TECHNOLOGY

[7 Hours]

Learning Outcome-

- ✓ *Understand how Science is related to ethics and values has ethical implications.*
- Ethics of Science and Technology. Are science and Technology ethically neutral? Are Science and Technology Value Free?
- Ethics of scientific Research ,Innovation and Technology
- Ethics of Social Media, Modern Gadgets
- AI and Ethics

Subject Teacher: Philosophy or Any Science Teacher

UNIT-VI- ETHICS AND VULNERABLE SECTIONS OF SOCIETY

[10 hours]

Learning Outcome-

- ✓ *Understand how various vulnerable sections of our society are treated unequally and what needs to be done to address their inequality*

✓ *Understand dimensions of substance abuse*

1. **Women and family**—Gendered practices in the family, marriages (dowry, child marriage, women's consent).

Women and work—women's work at home and at work place, pay gap, gendered roles, harassment at work place and working women and role conflict.

Women and Society— Gender sensitive language, property right, marriage-divorce/Separation and women's right; violence against women

2. **Issues Relating to Children:** Nutrition and health , Child Exploitation: Child labour ,trafficking, sexual exploitation
3. **Issues Relating to Elderly Persons :** Abuse of Elders, Financial insecurity, Loneliness and Social insecurity, Health Care Issues, Needs for a happy and Dignified Ageing
4. **Issues Relating to persons with disability:** Rights of PWD, affirmative action, prevention of discrimination, providing equal opportunity, various scheme for empowering PWD and social justice for PWD.
5. **Issues Relating to Third Gender:** Understanding LGBTQ, Social justice for them, Removal of discrimination, Affirmative action and Acceptance of diversity of gender.

Subject Teacher: Sociology/political Science /Anthropology or Any Science Teacher

Sample Questions-

1. Birsa Munda belongs to which state of India?[1 mark]
2. Recall at least 4 constitutional values from the preamble to India constitution.[2 marks]
3. Explain utility of being Punctual.[5 marks]
4. Explain the ethical principles a scientist should follow.[8 marks]

Course material: To be developed by OSHEC and DDCE, Utkal University. Video Lectures will be also prepared by OSHEC and VTP, Utkal University. There shall be no internal examination for this course. The Term End Examination shall be conducted by the respective Universities. Student would engage in self-study and colleges shall conduct at least 4 doubt clearing session for each unit by engaging subject teachers as indicated above. The Principal may assign responsibility to any teacher.

SUMMER VOCATIONAL COURSE UNDER NEP – 2020

(Students may choose vocational courses after 2nd Semester opt for exit. Student have to pay additional fees for this as specified by the course provider)

SEM-II: Education in Early Childhood

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Course Outcomes:

The completion of this course will result in understanding of fundamental learning processes and mechanisms involved during early childhood years that has important repercussion on cognitive, linguistic, and psychosocial maturity of a child. Since it is important for both parents and teachers to understand their role in early stimulation without burdening the young mind, this course is meant for all students in general and aspiring preschool professionals in particular.

Unit-I: Introduction to Early Childhood Education

- Meaning, significance and objectives of Early Childhood Education (ECE); Issues Influencing the Practice of Early Childhood Education, understanding child's rights to recognize young children as participants in their own development to create responsive environments
- Significance of Play; Programme planning and evaluation in early childhood education

Learning Outcome: The knowledge regarding background and concept of ECE will be acquired along with child right perspective.

Unit –II: Role of family and teacher in childhood

- Role of parents: Critical years of learning of a child; preparing enriched environment for infants and toddlers; children with disabilities; culturally appropriate practices.
- Role of Teachers: Preschool years and goals of preschool, school readiness and holistic development of a child; children with special needs and inclusive classroom

Learning Outcome: Students will be clear about the role and contribution of family and teachers during childhood.

Unit-III: Assessment and use of Technology for children

- Assessment and Its Purpose; Developmentally appropriate classroom assessment, reporting to and communicating with Parents and Families, Types and Methods of Assessment, Assessment for School Readiness; Purposes of Observation.
- Children of the Net Generation: Technological Integration in Educational Settings; Digital Literacy, Supporting Children's Technology Use ; Developmentally Appropriate Technology Use for Young Children

Learning Outcome: Students will understand the role and contribution of assessment and technology during childhood.

Unit IV: Practical (Any two)

- (i) Conduct a case study of a child from Anganwadi / pre-school regarding her participation in classroom learning activities.
- (ii) Visit a preschool and write a detailed report on its use of early stimulation learning aids.

- (iii) Visit a preschool for special children and prepare a report on its teaching-learning practices.
- (iv) Write a report on technology used in a preschool for classroom activities of children.

SUMMER VOCATIONAL COURSE UNDER NEP – 2020

(Students may choose vocational courses after 4th Semester opt for exit. Student have to pay additional fees for this as specified by the course provider)

SEM-IV: GERIATRIC CARE AND EDUCATION

(4 Credit, Theory: 45hrs, Practical: 30hrs)

Course Outcomes (COs):

On completion of this course, the learners will be able to:

- Understand the stages of growth and development.
- Differentiate the characteristics of growth during adolescence.
- Know the objectives of Sex Education.
- Acquire skills to adopt a good family life.
- Grasp the role of parents and teachers to ensure good family life.

UNIT I Adolescence Education

LO: Mention the characteristics of growth during adolescence.

LO: Know the scope of sex education.

- Stages of growth and development, Characteristics of growth and development during adolescence, Drug abuse: problems and issues
- Sex –education- meaning, objectives, need and scope
- Methods of dissemination of sex education, course content of sex education, Role of teacher

UNIT II Adolescence and Adulthood

LO: Grasp the difference between Adolescence and Adulthood.

- Adolescence development.
- Adolescence developmental theories.
- Young Adulthood.
- Middle Adulthood.
- Late Adulthood.

UNIT III Family Life Education

LO: Understand the need of family life education.

- Family life Education –meaning, objectives, need and scope
- Essential elements of good family life. Importance and need of good family life education
- Role of education for good family life, role of teachers, role of parents and community, counselling for good family life.

UNIT IV Marital Life

LO: Identify the factors of Marital conflict.

- Marriage- Basic concepts, types and function
- Marital role
- Marital conflicts
- Marriage counseling

Sample Questions

- 1) What is the age range of Adolescence period? (1 Mark)
- 2) Mention any two objectives of Sex Education. (2 Mark, Within 50 words)
- 3) Define the role of education for good family life. (5 Mark, Within 300 words)
- 4) Describe different types of marriages with suitable examples. (8 Mark, Within 500- 800 words)

Mode of Course Transaction: Team Teaching, Dialogue, Peer-Teaching, Peer Group Discussion, Collaborative and Cooperative Learning, Field Trip, Self-Learning.
--

Suggested Activities (Any one)

- 1) Review and analysis of the work done by Govt. and Non-Govt. Organizations.
- 2) Writing report on Adolescent's behaviour in different Socio-economic settings.
- 3) Conducting a survey in a community.
